

TAKE ACTION!

On April 30th, the House Oversight Committee passed a legislative proposal that includes drastic cuts to the retirement benefits that postal employees have **earned** through years of hard work, dedication, and sacrifice.

WHAT WOULD THESE BENEFIT CUTS MEAN FOR YOU?

- ✗ Uniform FERS Contribution Increase:** Increases retirement contributions to 4.4% for all postal employees. If you make \$60,000 a year, that means a \$2,000 reduction in your annual take-home pay.
- ✗ Elimination of FERS Annuity Supplement:** Removes the supplement for postal employees retiring before age 62. If you plan to retire at 57, this will force you to work another five years.
- ✗ Change to Annuity Calculation:** Changes the retirement calculation from your highest-three earning years to highest five. Over the course of your retirement, this means losing tens of thousands of dollars and reducing your annuity for life.

Postal workers deserve dignity in retirement, not broken promises!
