Holy Cross School
Indianapolis, IN

CHOOSE YOUR PATH:

PATH 1:

Climate & Behavioral Management

PATH 2:

Curriculum & Instructional Delivery

You will be immersed in:

- Engaging Instruction
- Demonstration Classrooms
- Grade Level Learning Clubs
- Motivational Keynotes

WELCOME TO C.L.A.S.S. EDUCATION!

We are excited to be hosting this year's Summer Institute in person at Holy Cross School with the option of attending Online too! Whether you have been with C.L.A.S.S. for 30 years or are brand new to C.L.A.S.S., we welcome you to this life changing event as we take you on a journey of what it means to teach based upon how the brain learns.

This year, we are offering you two paths to choose from:

- PATH 1: Climate and Behavioral Management
- PATH 2: Curriculum and Instructional Delivery

You choose which path is right for you! Each day will move quickly, with a mix of direct instruction, demonstration classrooms, and grade level learning clubs where you will discuss strategies in smaller group settings. You will also be immersed in a motivational keynote message each day to inspire and encourage you in preparing for the coming school year. We hope you can join us as we celebrate the ability to come together, learn from each other, and collaborate as we look toward how best to serve our future generations!

Jim McMillan

CHOOSE YOUR INSTRUCTIONAL PATH

PATH 1:

Climate & Behavioral Management

This path focuses directly on the practices and processes of creating a school-wide climate and culture that is positive, engaging, and absent of threat. These three days will take you on a journey of understanding how the brain learns best when placed in an environment that is designed for collaboration, novelty, and creativity.

You will study:

- How to build self-efficacy in your students through modeling and language
- Classroom design strategies to increase productivity based on brain science
- Structures to use for building inclusion and strong relationships within your classroom
- Daily tools to use in lowering anxiety, increasing engagement, and building curiosity
- Practices used to integrate leadership and character traits into your daily instruction
- Behavioral intervention strategies to use for situations when students are struggling with behavioral expectations

PATH 2:

Curriculum & Instructional Delivery

This path focuses directly on the practices and processes of how to teach the way the brain learns. These three days will take you on a journey of understanding how the brain learns best when using engaging curriculum and a strong framework for lesson delivery.

You will study:

- How to create a yearlong mindmap from your standards that organizes and engages your students
- Interleaving tools you can use throughout the day to review past learning, assess, and introduce new lessons
- Engagement strategies to use during your direct instruction to "hook" your students into the lesson
- Collaboration structures to use with students to process information and skills to long-term memory
- Novel practices students can use to demonstrate their knowledge and skills in meaningful and creative ways
- The interworkings of the brain and learning and how it can become the foundation of your teaching practice
