

DOGWOOD RACING LOWERED OIL PAN
ZX14, ZX10, Hayabusa

1. Be sure the pickup and pan are clean and free of debris before assembly.
2. Use the same amount of oil as you did before the pan was cut, the oil site window is no longer an accurate indicator of correct volume of oil. For example, If you used 5 quarts of oil with the factory pan use 5 quarts of oil with the modified pan.

ZX14 Note – Trim or remove the rubber oil return hose. You do not want this oil return outlet touching the bottom of the pan.

Hayabusa Note – Trim or remove the metal return fitting. You do not want this oil return outlet touching the bottom of the pan.

Dogwood Racing, it's Owners or Managers are not responsible for any injuries or damages with the use of this product. For off road use only.
