TOTAL DETOX ANTI-AGEING

GLUTATHIONE BOOSTER

Stimulates the body's natural glutathione production
A powerful protector against premature ageing

DESCRIPTION OF THE EXPERIMENT:

Study of the detoxification capacity of TOTAL DETOX ANTI-AGEING on the liver. An experiment was carried out to study the strength of this supplement to clean the liver and improve general health.

50 volunteers agreed to have a blood analysis done before and after taking TOTAL DETOX ANTI-AGEING capsules.

A blood sample was taken to determine the activity of the enzymes that are related with liver health: GOT, GPT and GGT. High activity of these enzymes indicates a stressed liver which has problems eliminating toxic molecules.

After taking 2 capsules of TOTAL DETOX ANTI-AGEING a day during a month, another blood test was performed to check the activity of the liver enzymes.

For all people involved in the experiment their general health improved tremendously by taking TOTAL DETOX ANTI-AGEING, which was evident by a reduction in the activity of the liver enzymes, even reaching normal levels in some cases after only 1 week.
