

AMPP Supervisor / Competent Person for Deleading and Hazardous Coatings Removal Course (C3 Training - C5 Refresher)

C3 Training Course, October 20 - 23, 2026 (4 days)

C5 Refresher Course, October 19, 2026 (1 day)

Mare Island, Vallejo, California

Contains specific discussions in key areas: protecting workers, compliance with OSHA/EPA regulations, waste streams and disposal management, operations resulting in potential exposures to lead and other hazards, plus associated control measures for mitigation. Includes background information on the hazards of toxic metals and materials with current legal & regulatory issues, and 2025 OSHA lead changes.

Who should attend?

Coating / Paint Contractors, Competent Persons, Specifying Estimators, Project Managers, Environmental Health and Safety (EH&S) Personnel, Engineers, Consultants, Inspectors, Facilities/Risk Managers, Owners

Educational benefits of attending

- Identify sources of hazardous coating and materials, and the relative risks posed by industrial painting and construction coating activities.
- Describe potential health effects and risks associated with hazardous coatings and toxic materials.
- Implement controls and work practices necessary to protect workers, the public and the environment.
- In-depth discussion regarding OSHA / EPA regulations applicable to industrial painting and coating activities

What the C3 training and C5 refresher courses cover...

- Hazardous coatings and materials in industrial painting
- Legal and liability issues
- Air, soil, water/sediment, dust regulations, and monitoring strategies
- Worker protection from hazardous coatings/materials
- Respiratory protection and PPE
- Management of solid and hazardous waste and disposal streams
- Sources of hazardous coatings exposure
- Control of environmental releases (containment and ventilation)
- Specifications, submittals, and site-specific compliance programs
- Pre-planning and worksite preparation
- Competent Person (CP) responsibilities / demobilization

Course format: Each participant will receive a comprehensive manual that includes references for additional reading and relevant handouts. For C3, hands-on workshops, following many of the units, reinforce the key points and allow students to evaluate their knowledge. Quizzes help students prepare for the multiple-choice exam administered at the end of the course. To receive a certificate and CEUs, you must attend the entire course and attain a 70% or better score on the exam.
