## TOPIC:

Upcoming Changes to Cal/OSHA's Lead In Construction Regulations, and Beyond!

## SPEAKER:

Michael C. Sharp  
 Senior Safety Officer, Janus Corporation

## ABSTRACT:

Mike Sharp, as a life-long educator, brings a fun and engaging approach to learning about "Lead" (Pb) and "Hazardous Materials Management" in the industrial, commercial and public sectors. Upcoming changes to the long-held lead regulations are looming large across the nation and will be highly impactful in the world of construction/rehabilitation. From OSHA to EPA, Mike's program offers a regulatory history of lead, relating to coatings and corrosion, and outlines details of the proposed revisions as well as the effects on business and agencies with "real world" views of the changes. His approach includes historical context, academic studies and the impending range of impacts facing our industries.

Be prepared... don't forget your smart phone because Mike engages his audience in an interactive and educational format that tests your knowledge and prepares you for the upcoming "lead" changes that are inevitable!

## BIOGRAPHY:

Mike Sharp has 40+ years of experience in the hazardous materials industry from being contractor for five years, to an instructor for 25 years, and a high-regarded international consultant for 35 years.

Mike received his BA of Communications from California State University, Chico. He has published extensively on topics relating to lead and hazardous materials in construction. He has served as Director of Training for the UC Berkeley Center for Occupational and Environmental Health and maintains private consulting and training commitments as a subject-matter expert.
