Topic:

Change Management is a framework that recognizes the cost of early adoption as an investment in the future. This allows stakeholders to place a greater priority on change readiness.

Speaker: Paul "Scot" Foreman P.E.

Biography:

Scot has been a professional corrosion engineer for more than 30 years. He currently works for the CA Dept. of Water Resources (DWR), focusing on applying the 2024 update of SP-0169. Having a lifetime of corrosion experience, Scot is passionate about change management in the face of accelerating change and the implementation of artificial intelligence.

Scot holds a PE in corrosion, and corrosion specialist certificate. As an instructor, Scot taught for AMPP as a CP-1 & CP-2 instructor and presented at the Western States Corrosion Seminar on Sacrificial anode ground bed design for more than 25 years. Scot co-authored the AWWA Research Foundation report on infrastructure reliability, External Corrosion and Corrosion Control of Buried Water Mains.
