Bio for Raul B. Rebak

Raul B. Rebak is a Senior Corrosion Engineer working at the GE Global Research Center in Schenectady, NY since October 2007.

Previously, he was employed at the University of California Lawrence Livermore National Laboratory where he was the lead for materials corrosion testing in the Yucca Mountain Project.

Raul has more than 30 years' experience in Corrosion Science and Corrosion Engineering both from the academic and the industrial fields. He has an extensive research background in nuclear materials, including power generation and nuclear waste disposition. Currently Raul leads a multimillion dollars' multiyear project with the Department of Energy in Accident Tolerant Nuclear Fuels. Raul is also involved in several other areas of materials degradation such as oil & gas, aviation, transportation, and energy storage.

Raul is very active in seven national and international professional societies chairing committee activities, organizing symposia and publishing.

Raul has a Ph. D. degree in Materials Science and Corrosion from The Ohio State University (USA)

Raul is a Fellow of NACE International, The Corrosion Society.
