

First-Class Industrial Electrical Motor Repair & Transformer Services

You've Got
Electrical Problems,
We Have **High-Class**
Solutions

Company Profile

Remsa USA: El Paso's Best
Source for New and Improved
Brand Motors.

Family Business Owners

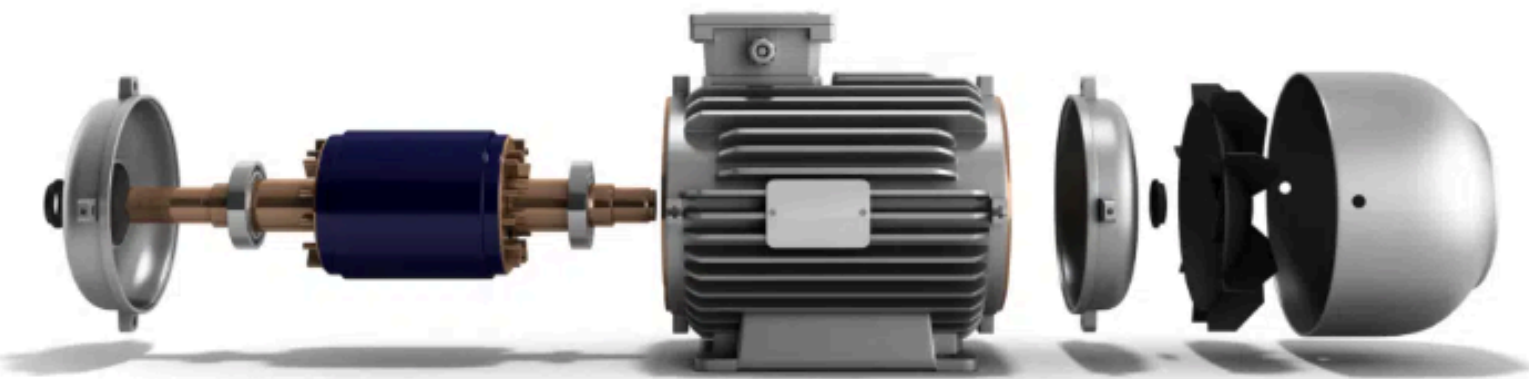

As the company started growing and expanding to new industries, our focus began to shift towards the mining industry and developed a strong working relationship with Minera Mexicana de Cananea and Mexicana de Cobre. As time passed, REMSA Group grew into a well-established company, with an excellent group of hard-working men and women willing to achieve one main goal: to provide our clients with the best quality of work and service. Thanks to our international success and over 20 years of experience, REMSA Group now serves the factory industry, the agricultural industry and is currently serving more than 30 well-known mines in Mexico. The strong demand of work and the invitation of well-known companies have proudly led to the opening of REMSA Group in the United States of America, which led to the adoption of that distinction in our company name.

Legacy

Electrical Problems

You've Got
Electrical Problems,
We Have **High-Class**
Solutions

Welcome to Remsa USA, Inc, where we specialize in electrical motors, transformers, and pumps to power your facility and industrially-based functions.

More and more, electric motors and transformers have proven themselves to be an integral part of our day-to-day life. Many industries and manufacturing plants rely on the delivery of high currents over a varied range of voltages for their functioning and productivity. These industries are what power and supply our lives. At Remsa USA, we take it upon ourselves to help revolutionize industries with our industrial electric motor repair and transformer services. Our supply of motors, pumps, and transformers can be applied to all variations of heavy-duty applications and will keep your systems running at optimal speed and efficiency.

About the Company

Our Mission and Vision

Briefly elaborate on what you want to discuss.

About Remsa USA

Remsa USA first opened its doors to the public in 1987 in Ascencion, Chihuahua, Mexico with the purpose of serving the local agricultural. This area was significant for possessing approximately five thousand wells.

A Continuous Record of Success

As the company started growing and expanding to new industries, Remsa USA's focus began to shift towards the mining industry and developed a strong working relationship with Minera Mexicana de Cananea and Mexicana de Cobre. As time passed, Remsa USA grew into a well-established company, with an excellent group of hard-working men and women willing to achieve one main goal: to provide our clients with the best quality of work and service.

Thanks to our international success and over 20 years of experience, Remsa USA now serves the factory industry, the agricultural industry and is currently serving more than 30 well-known mines in Mexico. The strong demand of work and the invitation of well-known companies have proudly led to the opening of Remsa USA in the United States of America, which led to the adoption of that distinction in our company name.

Our Mission and Vision

We continue to work on the same vision that we had when we first began our journey in Mexico which is to provide first-class service and work, including electric motor repair, transformer maintenance, rewinding electrical motors, and more. We have also revised our goals to achieve higher levels of success and we strongly pursue perfection in the way we work and serve our clients. We are willing to invest time and effort to achieve every single goal and provide our clients with high-quality customer support and value.

+20 years of experience

We Live Up to the Highest Standards of Quality, Integrity, and Excellence

The Remsa USA charter always starts with quality, taking to heart the needs of the customer first. Remsa USA is proud to have built its reputation on being the very best in the motor repair industry. This level of excellence is achieved through our professional teams including our departments of electrical motors, electric motor testing, electric motor field services, and pumps, and new electric motor sales.

Each of our employees are to be accredited by EASA (Electro-Mechanical Authority), ISNetworld, and they must abide by IEEE standards. Working by these standards allows us to provide our customers with exceptional work ethic and final products.
