ABOUT US

Diamond Gloves is one of the fastest growing disposable gloves companies nationwide. Our products are being used in a wide range of industries such as medical fields, food service, and janitorial service. We are committed to provide the ultimate customer satisfaction by offering gloves that are reliable for a wide range of applications. We believe our integrated supply chain enables us to offer the most mil for the best price in the market.

Diamond Gloves is headquartered in Santa Ana, California. We strive to provide high quality products, outstanding service, and competitive prices. Our comprehensive selection of gloves enables our distributors to provide options across this category.

We manufacture industrial and examination grade gloves depending on the level of protection needed. Glove materials include latex, nitrile, polyvinyl chloride and polyethylene. They have different thicknesses to handle both light and heavy duties. Vinyl and polyethylene are often found in the food industry. Latex and nitrile gloves are used in the medical field and in automotive work. We also now sell additional personal protective equipment, including bouffant caps, shoe covers and beard covers. Our face masks are also important for respiratory sanitation. Diamond Gloves also has a customer fulfillment program which is ensured by our fully stocked warehouse to anticipate customer shipping demand. We also ship our products internationally as needed.

QUALITY CONTROL

Our disposable gloves are of the utmost quality. This is a top priority no matter the customer. The gloves meet the highest standards and we have the quality to meet high levels of demand. We are highly reliable and able to fulfill demand for large orders on short notice due to our warehouse inventory. We will do our part to ensure your satisfaction.

Our gloves go through rigorous testing in production to ensure all variables are carefully considered. Customers will receive the glove material and thickness most appropriate for their needs. Whether latex free is a consideration or especially strong mil thickness, Diamond Gloves has a glove that is the right fit for your needs.
