

| ITEM                            | Symbol | Description   | Application   |
|---------------------------------|--------|---|---|
| Polyethylene                    | PE     | HDPE- High Density Polyethylene                     | Film extrusion, blow and injection molding                          |
| Polyethylene                    | PE     | LLDPE- Linear Low Density Polyethylene              | Film extrusion, injection and roto molding                          |
| Polyethylene                    | PE     | mLLDPE- metallocene Linear Low Density Polyethylene | Film extrusion  |
| Polyethylene                    | PE     | MDPE- Medium Density Polyethylene                   | Film extrusion and roto molding                                     |
| Polyethylene                    | PE     | LDPE- Low Density Polyethylene                      | Film extrusion and injection grade                                  |
| Polyethylene                    | PE     | PE 100 - Polyethylene 100                           | Pipe - black and natural  |
| Polyethylene                    | PE     | PE 80- Polyethylene 80                              | Pipe- black and natural   |
| Polystyrene                     | PS     | GPPS- General Purpose Polystyrene                   | Extrusion and injection molding                                     |
| Polystyrene                     | PS     | Random Copolymer                                    | Extrusion and injection molding                                     |
| Polystyrene                     | PS     | Impact Copolymer                                    | Injection molding   |
| Polypropylene                   | PP     | Homopolymer   | Film (TQ/BOPP), sheet, raffia, fiber and injection                  |
| Polypropylene                   | PP     | Random Copolymer                                    | Extrusion and injection molding                                     |
| Polypropylene                   | PP     | Impact Copolymer                                    | Injection molding   |
| Poly Vinyl Chloride             | PVC    | Poly Vinyl Chloride                                 | Extrusion and injection and calendaring                             |
| Ethylene Vinyl Acetate          | EVA    | Ethylene Vinyl Acetate                              | Extrusion and injection molding                                     |
| Polycarbonate                   | PC     | Polycarbonate                                       | Bottle, sheets and injection molding                                |
| Acrylonitrile-Butadiene Styrene | ABS    | Acrylonitrile-Butadiene Styrene                     | Injection and extrusion molding                                     |
| Polyethylene Terephthalate      | PET    | Polyethylene Terephthalate                          | Bottle, sheets, strapping, hot fill and carbonated soft drinks(CSD) |
