## Making use of Globally Abundant Recyclable Materials

Diverting/Recovering/Reusing/Containing Long-Term  
some of >55 Million tons of Plastic added to our  
Eco-systems Every Year

Scrap Steel  
PET Plastic  
Glass

Benefitting people

Benefitting the planet

Zero Flame Spread Homes that tolerate temperatures above 800° C

The most affordable form of new construction is manufactured housing,  
which remains heavily underutilized

Joint Center for Housing Studies of Harvard University - 2025
