

PSA RESULTS – SCORES OF OVER 10 AND AGES OF MEN

NOTES

1. This represents all scores found via the new online booking system from its launch in January 2020 to the end of 31st January 2022. Since we and other like-minded groups were unable to carry out testing events between the middle of March 2020 and the middle of July 2021...some 16 months in total.... the figures would have been much higher in normal circumstances.
2. You'll see the findings are quite frightening with too many scores well into three figures reflecting the paucity of testing of men over 40 in the UK. Whilst it is accepted there are drawbacks and obstacles to a national screening programme using psa tests alone, we do believe every man should be offered at least one test after his 40th birthday to put down a "marker" for determining an ongoing testing regime for him. If this were currently in place we believe the incidence of these unacceptably high scores, often at the time of their first test, could be avoided. Our current testing practices are geared to a "risk based" approach with men being assessed as low, medium, or high risk with retesting intervals of one, two or three years advised accordingly

PSA RESULT	AGE OF MEN	PSA RESULT	AGE OF MEN	PSA RESULT	AGE OF MEN
13	72	20.9	61	10.3	65
