PERCENTAGE OF THESE AGAINST ALL F/T RATIO 18% OR MORE (RED) 38.27%

Family History New Heading "Question Incomplete"

The re-worked consent form from Mar 2010 onwards is unfortunately not totally clear. The question should have been 'is there any history of Prostate or Breast Cancer in the immediate family?'.
 Yes No Don't Know

Yes No Don't Know

Circle as appropriate - If yes please circle the relevant detail. It is felt therefore that because nothing has been put on a question that only looked for positive information it is unsafe to assume no entry means 'NO' it could equally mean 'Don't Know'.

In view of this the Question Incomplete or QI code has been entered in these cases. The consent form was amended in 2014 so there is no doubt going forward.
