Update on Statewide coordination of Adult Education data tracking and reporting: The Bay Area Community College Consortium spoke with Debra Jones and Matt Roberts from the Chancellor's Office in February regarding the data related issues at the 1/27/16 convening of the Bay Region's 16 Adult Ed Consortia. They stated that the Chancellor's Office and CDE are aware of the need to have a standard set of data elements collected and reported across all consortia and that definition and specification of these elements must come from the state. More than that, the CO and CDE are making significant progress on this and will be providing information about the status of these efforts in the coming weeks. For more information on this update, please click [here](#).

The group discussed this information. Joel emphasized the importance of the State integrating WIOA reporting. Joel also stated the CO/CDE wants to see what is developed in the field for data tracking/reporting and then will likely endorse one of these efforts. There was a discussion of what systems people were currently using and the difficulties of capturing some data (ie – wage increases).

Update on West Ed data tracking/reporting pilot: Joel stated he is waiting for the specifications of the data from the initial cohort. The schools in the pilot (Contra Costa and Coast) are currently in the process of developing these. West Ed will hopefully have a demo ready this summer. Joel suggests the NSCCSTC moves with the Bay Area as a whole, as opposed to launching our own individual pilot. The only drawback from waiting is we will not be able to provide initial input on the demo, however there will be later opportunities to provide feedback.
