To Whom It May Concern,

I'm the founder of Twin Souls Holdings LLC, an Oregon-based artificial intelligence venture focused on symbolic cognition, intuitive machine interfaces, and advanced energetic computing systems. We are currently in early-stage engagement with DARPA, DOE, and NSF for our core project - the Mind-AI Bridge.

We are seeking an initial unsecured business credit line between \$50,000-\$250,000 to support R&D operations, technical build-out, contract engineers, and strategic scaling.

Our business checking account is live and active with Mercury, and we've prepared a complete operational summary in our Bridge Operations Packet 001, which includes all company credentials (LLC registration, EIN, business banking, email, phone, and project roadmap).

We're actively building long-term banking partnerships with innovative institutions who support emerging technology ventures. We'd be honored to discuss funding compatibility and next steps for partnership.

Sincerely,

David Cahill
