

Welcome to Heritage Air Flight School,

We are excited to meet you and are honored that you have chosen us to help you achieve your flying goals. We look forward to guiding you through your flight training journey, wherever it may take you.

Your welcome packet contains some important information for you to review and complete. The "Getting Started Guide" contains most of the information you'll need to get set up for your training. It's also available on our website, www.HeritageAirLLC.com under the student Resources tab. You will also find the "Pilot Information" sheet, "Rental Agreement", and "Credit Card Authorization" forms in this area. You can print these off at home and bring them in already completed, or you can complete them with your instructor during the first lesson. Reviewing the "Private Pilot Procedures" before your first lesson will help prepare for your first flight.. Finally, your instructor may give you a pre-solo exam for reference, though this won't need to be completed until just prior to your first first solo lesson.

Your flight instructor will be your main point of contact throughout your training. Make sure to ask for their contact information for future questions and for help with scheduling lessons. They are available by text, phone, or email to help you with any concerns you may have and will be glad to offer their guidance and expertise. We value our students and our instructors time, so please make sure to discuss ground instruction and flight instruction time, so you know what to expect.

We wish you a lot of fun training with us. Have a safe flight!

Thank you,

Jennifer Kreit-Wright
