cITopus NSX-V to NSX-T (V2T) Migration Kit

The cITopus NSX V2T Migration Kit helps users migrate from VMware's NSX-V to NSX-T (V2T). The kit is designed to help you perform the NSX V2T migration at the lowest risk, and shortest outage duration possible, while offering ample opportunity to perform the necessary validation. cITopus has been developed based on real world NSX V2T migration experience, and VMware best practices. It is the most widely used NSX V2T Migration technology!

The cITopus NSX V2T Migration Kit includes the following:

- cITopus licensing to fit your environment, Very Small, Small, or Medium
- "Bucket" of V2T Consulting Hours by The MOST EXPERIENCED support team for your migration.
  Bucket of Hours - Very Small: 20 Hours, Small: 40 Hours, Medium: 100 Hours Ideas to use your hours:
    - Guidance, i.e. Planning, Design
    - Assessment of environment to identify risks
    - Conversion of the ESXi hosts from NSX-V to NSX-T
    - Test Migration In The SPJ Solutions V2T Migration Lab
    - Validation of the V2T migration
- Migration Architecture
- Implementation Plan
- Roll-Back Plan
- Configuration Workbooks
- Testing and Validation Procedures

With the combination of cITopus, the most widely used NSX V2T Migration technology, and the most experienced NSX V2T Migration support team you are on your way to a successful NSX V2T migration!
