

WILDERNESS

FIRST AID INTENSITY LEVEL II

WHY WILDERNESS/REMOTE FIRST AID?

Wilderness is defined as any geographic location more than 1 hour away from definitive medical care.

Where do you need W/RFA skills?

Recreation

- Hiking
- Backpacking
- Climbing
- Camping
- Cycling
- Boating
- Birding
- Hunting

Remote Locations

- Farm accidents
- Auto accidents
- Construction
- Rural Areas
- Vacation Homes
- Schools

Natural & Other Disasters

- Winter Storms
- Tornadoes
- Floods
- Lightning Strike
- Snake/Other Bites
- Mass Casualty Event

How is W/RFA different than Standard First Aid?

- Wilderness/Remote First Aid is an in-depth training that teaches you how to effectively deal with medical emergencies when medical care is more than 30-60 minutes away.

Key Topics in W/RFA Course:

- CPR/AED/Choking Certification
- Stop the Bleed Certification
- Patient Assessment
 - Airway/Breathing
 - Severe Bleeding/Shock
- Trauma Emergencies
 - Bone/Joint Injuries/Splinting
 - Soft Tissue Injuries/Cuts/Burns
- Medical Emergencies
 - Asthma
 - Stroke
 - Diabetic
 - Seizure
- Environmental Emergencies
 - Ticks/Spiders/Snakes, etc.
 - Heat & Cold Injuries
- First Aid Kits & More not listed.
