energy  
with  
Lutron™ 

# What is pleasance?

**Pleasance is a fundamental feeling that is hard to define but that people desire to experience.\***

Your home is more than walls and a roof, more than simply a functional space. Your home is a place where you experience **comfort**, **romance**, and **peace of mind** – a place where you experience pleasance.

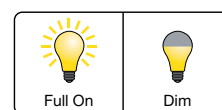

We believe the right light is a critical building block for pleasance, and the first step for enriching every moment within your home.

Let us show you how our solutions – which are easy to add to a **new** or **existing** home – can help you add pleasance.

## Table of Contents

For energy-saving ideas look for energy strategy icons throughout this brochure, such as the dimming strategy icon shown here.

\*The Free Dictionary

# Creating just the right light

Light Control

Rania® IR dimmer shown in white (actual size)

IR remote control shown in white (actual size)

## Create pleasure with a simple dimmer.

With a switch you can only turn lights on and off, so you're limited to bright light or no light at all.

If you replace a switch with a dimmer, such as a Rania® dimmer, you can adjust a room's light level to create a totally new atmosphere.

### Add a little romance

With a Rania dimmer, you can lower lights in your dining room for a romantic dinner, or brighten them for family meals.

### Select Lutron® dimmers to work with:

Incandescent/halogen bulbs

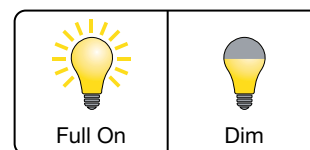

Compact fluorescent bulbs

LED bulbs

### Saving energy without sacrifice

Every time you dim the lights you save energy. Dimming by **25%**, for example, saves **20%** energy. Dim more and you'll save even more.

# Sophisticated daylight control

Our battery powered blinds, shown on these pages, have a 3-year battery life; available with an optional Pico® wireless control†.

Blind  
Control

†Available from September 2012.

## Create pleasure by controlling your window treatments at the touch of a button.

You probably think of blinds as a design element. Add automation to them, though, and they become a functional and magical element.

With the press of a button, you can lower Serena® honeycomb blinds so they block glare, creating a more comfortable room.

And if you install automated blinds in hard-to-reach windows, such as a foyer, you can easily adjust them for privacy.

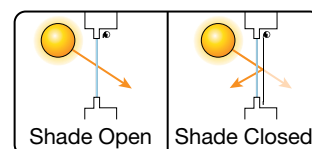

### Other styles available

As you can see in the photo above, our blinds align perfectly. We offer Venetian blinds, Roman blinds, curtains, Kirbé® vertical curtain system, roller blinds, and tensioned blinds. See pages 22 and 23 for details.

### Saving energy without sacrifice

Adjusting blinds based on the season can save you **10-30%\*** on heating and cooling costs.

\*Lutron® commissioned simulation by T.C. Chan Center for Building Simulation and Energy Studies, University of Pennsylvania, USA, September 2008.

# Coordinated control

Pico® wireless **light** and **blind** remote controls shown in white (actual size)

Light Control

Blind Control

## Combine light and blind control to take pleasure to the next level.

Having coordinated control provides greater flexibility in a room than having individual control, letting you fine-tune the mood you want to create.

With a GRAFIK Eye® QS Wireless system, you can control multiple lights with one button press and multiple blinds with another button press.

When you're in your home theater, you can dim the lights and lower the blinds to watch the big game – all from the comfort of your couch.

(And because the system is wireless, it's easy to install into any space.)

### Additional control

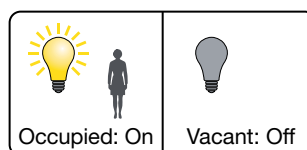

Expand control in a room by adding appliance control, occupancy/vacancy sensors, and lamp dimmers.

The plug-in appliance module turns off standby power to small appliances, such as A/V equipment, when they're not in use.

Sensors turn lights on automatically when you walk into a room and off when you leave.

### Saving energy without sacrifice

Standby power can amount to up to **10%** of a home's electricity use. An occupancy sensor can save up to **20%** lighting energy. So by combining light, blind, and appliance control, you can capitalise on your energy savings.\*

Expand **pleasance** from a single room to a whole home

Pleasance goes beyond basic light control. To fully experience the essence of pleasance™, let's explore how a Lutron® HomeWorks® QS system can redefine the way you live.

**10 Control from anywhere**

Take advantage of easy, convenient control from a keypad or your mobile device.

**12 Added integration**

Integrate your Lutron system with your home control for added functionality.

**14 The right temperature**

Ensure you're never too hot or too cold, with temperature control.

**16 Tying in your security system**

Enhance your security system for added peace of mind and greater energy savings.

**18 Customisation**

Choose HomeWorks QS for the ultimate in pleasance.

**20 Control styles and colours**

Complement the look and feel of any room.

**22 Blind styles and fabrics**

Select from a variety of styles and fabrics.

# Control from anywhere

Wall-mounted International seeTouch® keypad in satin nickel (actual size)

Light  
Control

Blind  
Control

Temperature  
Control¹

## Pleasance is also having control no matter where you are, home or away.

The HomeWorks® QS system offers control of lights, blinds and temperature from wall or tabletop keypads, as well as your mobile device.

The main benefit of a keypad is that you can create customised “scenes” – predetermined settings for lights, blinds, and temperature<sup>1</sup>.

When you press a keypad button, lights, blinds, and temperature automatically adjust to the levels you designated for that scene.

The number of buttons on a keypad is based on the number of different scenes you want to create in a room.

Control from a keypad also means you're always in touch with your system – from your car, your bedside, or your holiday home.

Lutron® Home Control+ app

### Saving energy without sacrifice

With a keypad, you can always manage the energy use in your home, even while you're away.

<sup>1</sup>Please see page 14 for more information on temperature control.

# Added integration

seeTouch® tabletop keypad in midnight (actual size)

Light Control

Blind Control

Temperature Control<sup>1</sup>

## Expand the benefits of pleasure with user-friendly, tech-smart integration.

Integrating a HomeWorks® QS system with your home's technology provides user-friendly, advanced control.

For example, integration with your A/V system means one button press will soften lights, lower blinds and the projector, and start the movie.

Lutron® Home Control+ app

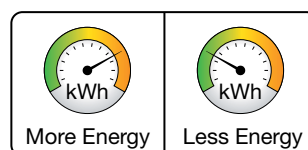

Save energy with your International seeTouch keypad in bright chrome (actual size)

### Saving energy without sacrifice

Integration also gives you a convenient way to save energy. The “Green” keypad button automatically dims lights by **5%**, lowers shades, and sets back temperature by **2%**.

<sup>1</sup>Please see page 14 for more information on temperature control.

Dynamic Keypad in black  
(actual size)

# The right temperature

Temperature Control

## Add temperature control for increased comfort and enhanced pleasure.

Integrating a user-friendly HomeWorks® QS system with your home's temperature control can ensure the whole family lives in perfect comfort. For example, integration with your temperature control system enables you to adjust heating or cooling systems any time of day, even while you're away from home.

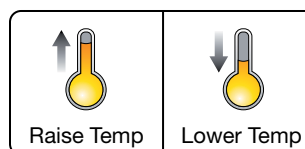

Lutron® Home Control + app

Rather than having six switches lined up on a wall, eliminate wall clutter with the Dynamic Keypad. Use it to adjust lights, blinds, HVAC and audio visual equipment from one convenient location. And with one touch of the 'Energy' button, you can dim lights, lower blinds, and reduce heating or cooling.

### Saving energy without sacrifice

Setting back the temperature when a room is unoccupied can help you save significantly – up to **16%** or more.\*

# Tying in your security system

Light  
Control

Blind  
Control

Temperature  
Control

Security  
Integration

## Pleasance means you feel safe in your home or while you're away.

By integrating your security system with our HomeWorks® QS system you have the added enhancements of light and blind control and the benefits they provide.

### Visible alert

If someone breaks into your home when your security system is activated, your lights will turn on, your outside lights will flash, your blinds will raise, and your keypads will lock so your lights stay on.

### Timeclock events

Your Lutron® system's timeclock and your security system can work in tandem so that your home looks occupied when you're not there.

The timeclock can trigger lights to turn on, dim, and turn off and raise or lower blinds based on your normal routine.

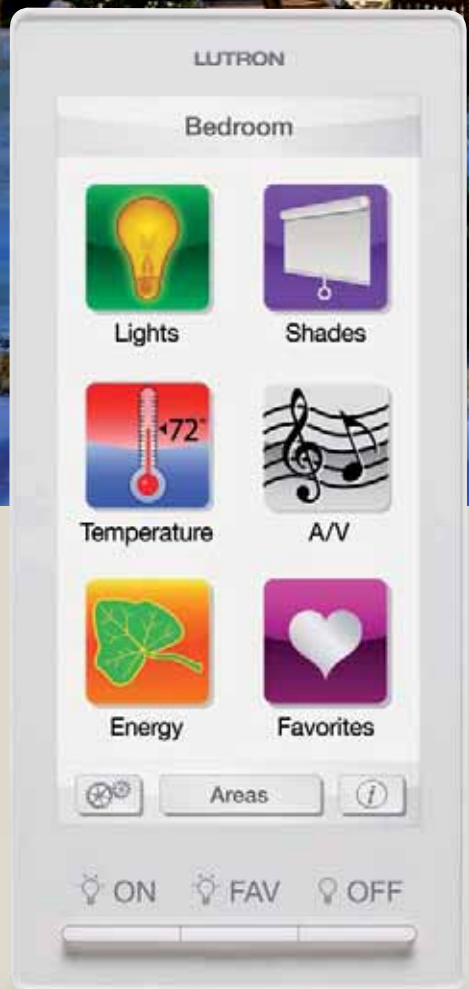

Security system keypad (by other)

### Saving energy without sacrifice

With security system integration, one button press will not only arm your security system, but will also roll back temperature, turn lights off, and lower blinds.

Dynamic Keypad in white (actual size)

# Customisation

Light Control

Blind Control

Temperature Control

Security Integration

## Customisation provides the ultimate in pleasance.

For advanced integration and customisation, HomeWorks QS has added features.

### “Thinking” buttons

HomeWorks QS keypad buttons can think for you, creating different light scenes from the same button, depending on the time of day.

For example, pressing the “Pathway” button between 10 p.m. and 5 a.m. creates a path of light to your bathroom. Pressing it after 5 a.m. creates a path of light to your kitchen.

### Custom interfaces

You can combine HomeWorks QS keypads with other manufacturers controls to maintain a consistent look throughout your home.

### Alternative control

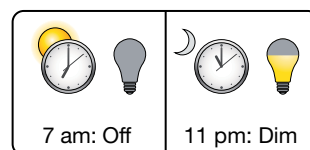

You may prefer the clean aesthetic of one sleek keypad, such as the Dynamic Keypad shown here, rather than a row of dimmers on your wall.

With HomeWorks QS, you don't need a dimmer for every light you want to dim. All you need is a keypad.

### Saving energy without sacrifice

Customisation means you can program settings to adjust based on specific criteria, such as season or day of the week.

During the summer, for example, you might want your landscape lighting to dim at 11 p.m., while during the winter you want it to dim earlier.

# Control styles and colours

**Pleasance is being able to complement the look and feel of any room.**

## **US seeTouch® style**

- Available for HomeWorks® QS
- Square corners
- Rectangular keypad
- Available in matte and metal finishes

## **International seeTouch® style**

- Available for HomeWorks® QS
- Square corners
- Square keypad
- Available in matte and metal finishes
- Multiple button configurations available for light, shade, audio video, and total home control

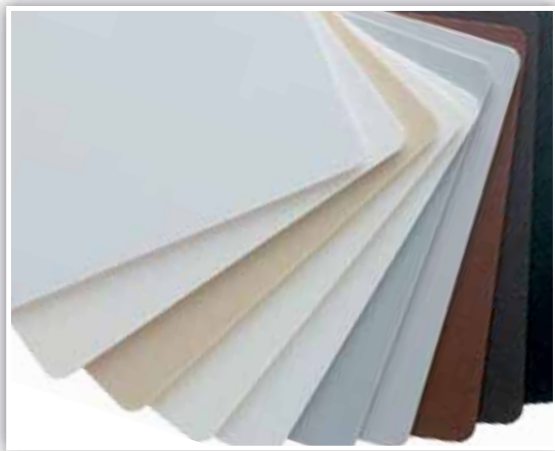

Choose from gloss, satin, matte, and metal colours and finishes for dimmers, wallplates, keypads, and accessories.

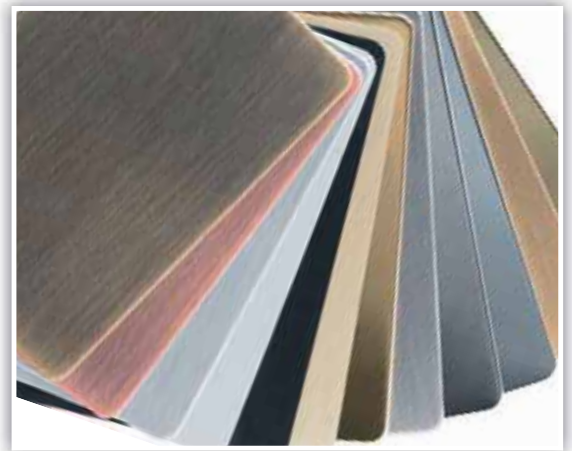

Gloss Colours (7)

Satin Colours (20)

Architectural Matte Colours (10)

Architectural Metal Finishes (12)

Matching wallplates (up to 6-gang) and accessories add a finishing touch to a room.

Accessories

# Blind styles and fabrics

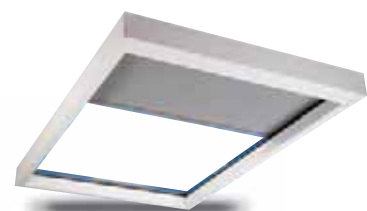

**Our automated blinds are available in a variety of styles so you can choose the type that works best with your home's design.**

**Battery Powered Blinds**  
Provide a 3-year battery life

**Draperies**  
Offer daylight control in pinch pleat or ripplefold styles

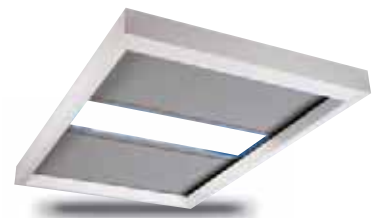

**Skylight Blinds (Tensioned)**  
Maximise the view when open

**Roller Blinds**  
Provide precise alignment of multiple blinds

**Kirbé® Vertical Curtain System**  
Eliminates stackback with its one-of-a-kind curtain roller system

**Meet-in-the-Middle Blinds (Tensioned)**  
Can accommodate openings up to 24 feet

**Venetian Blinds with tilt alignment**  
Control the tilt of the slats and lift of the blinds independent of one another

**Roman Blinds**  
Feature CERUS® safety technology, which eliminates exposed cords

**Bottom Up Blinds (Tensioned)**  
Close from bottom to top

We welcome customer's own material requests in addition to our well-rounded collection of blind fabrics.

# Bringing pleasance to you

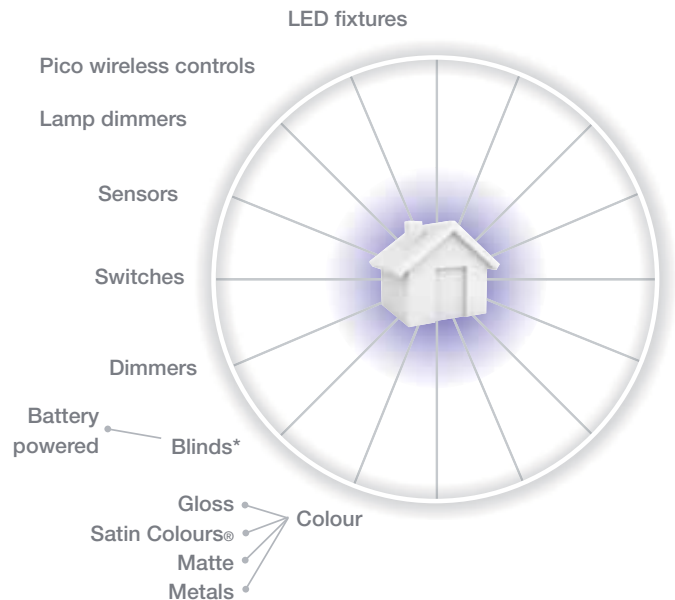

We offer two different systems that all provide pleasance, for a solution for any size home. When you add Lutron® control and all the benefits it affords, you'll wonder how you ever lived without it.

## GRAFIK Eye® QS

GRAFIK Eye QS Wireless is a system that's ideal when you want individual control in a single room or a few rooms.

### Characteristics

- One Pico® wireless control can control lights and blinds from anywhere in the space
- Occupancy sensors automatically turn lights on and off
- Our Ethernet interface allows you to integrate with all your systems so that you can easily control lights, blinds, video and temperature from one device

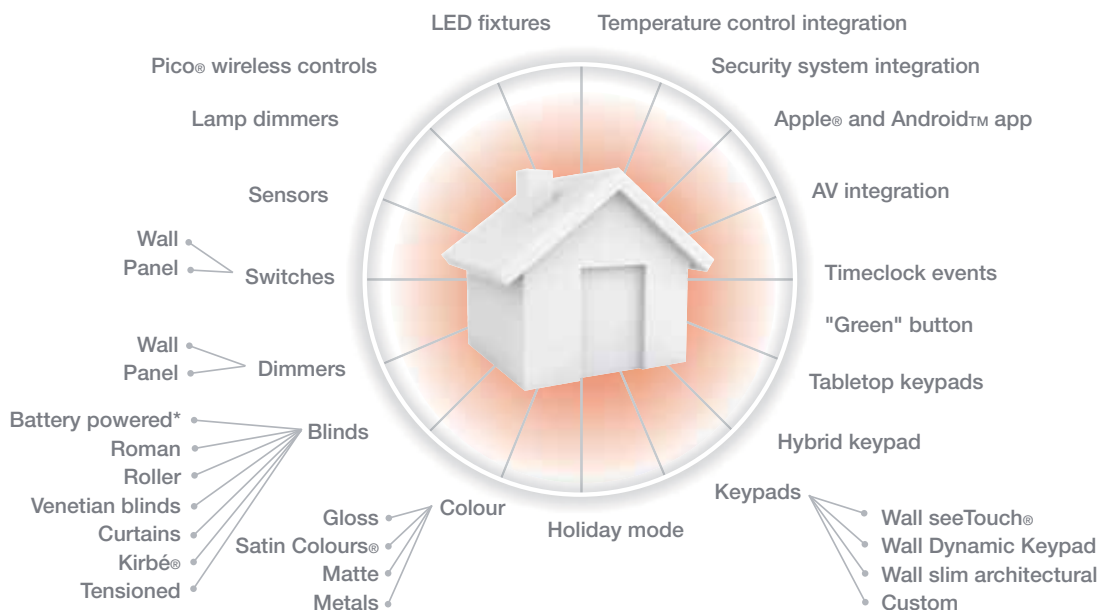

## HomeWorks® QS

HomeWorks QS is a wireless, wired, or hybrid system for control of a whole home (up to 30,000 square feet or more).

### Characteristics

- Offers the most colour choices for controls
- Offers the most keypad options, including customised keypads
- Hidden panels eliminate dimmers and switches on the wall
- Offers Holiday mode for added security while you're away from home for an extended time

\*Blinds and lights are controlled independently of one another
