

# What Makes Us Different

## Antimicrobial

Ultra-Fresh antimicrobial treatment inhibits the growth of bacteria.

---

## Cost Effective

Eliminates sterilization protocols required for reusing an electric fan

---

## FCC Compliant

FCC compliance (part 15) prevents interference with any electronics.

---

## Safe & Cordless

Battery operated. No cords, tripping, or shock hazards.

---

## Comfortable

Increases patient comfort, especially respiratory distress or post cardiac surgery.

---

## Convenient

Fans can be positioned anywhere and go home with the patient upon discharge.

---

## What does the Joint Commission say about fans?

There are no specific Joint Commission standards that prohibit the use of fans.

---

## 5 Inch Desk Fan

FD05805

## 10 Inch Fin Fan

FD10802A

### DUAL POWER CAPABILITY

AC adapter included

### REQUIRES 6-D BATTERIES (not included)

Runs 43 hours (low), 24 hours (high)

### POWERFUL 2-SPEED FAN

offers quiet cooling

### CONVENIENT CARRY HANDLE

Compact for easy carry and storage

### CASE PACK

4 pc - 16.5" x 12.5" x 14" (13.4 lbs)

## Deluxe Necklace Fan

FN02801

**ULTRA-FRESH**  
antimicrobial technology

**REQUIRES 2-AA BATTERIES** (not included)  
Runs 12 hours

**HANDS-FREE COOLING**  
with powerful vertical airflow

**CASE PACK**  
12 pc - 11.7" x 6.1" x 7.1" (3.4 lbs)

**ADJUSTABLE LANDYARD**  
with safety breakaway

# Antimicrobial Clip Fan

FC04805

**ULTRA-FRESH**  
antimicrobial technology

**REQUIRES 2-AA BATTERIES** (not included)  
Runs 10.5 hours

**HANDS-FREE COOLING**  
with powerful adjustable airflow

**CASE PACK**  
4 pc - 14.2" x 10.8" x 13.4" (4.1 lbs)

**CHILD RESISTANT BATTERY COVER**  
mini screwdriver included

# Healthcare Fans

## Infection Prevention

No need to sterilize. Our low-cost fans are designed to go home with the patient upon discharge.

## Patient Comfort

Supplements HVAC system. Helpful for patients with respiratory difficulties.

## Single Patient Use

Eliminates sterilization protocols required for reusing an electric fan.

## Battery-Operated

No need for electricity with our battery-operated fans. No cords to trip over.

Our cost-effective infection prevention solution is one that does not require sterilization between patients. At the end of the stay, the fan can go home with patient or be discarded. Nurses and Infection Preventionists have found the TREVA™ solution to be ideal.

Our entire offering is compliant with Part 15 of the FCC rules. This ensures that our products do not provide any interference with hospital electronics and telemetry equipment.

Our success is built on our ability to provide a powerful fan without the need for electricity and the safety issues created by having additional cords in the room. Improving patient comfort and satisfaction is our primary objective.
