TREVA™

TREVA's patented line of battery-operated healthcare fans aid hospitals in improving patient comfort and satisfaction while maintaining cost-effective safety and infection prevention protocols.

TREVA has been providing fans to healthcare facilities for many years. Our cost-effective infection prevention solution is one that does not require sterilization between patients. At the end of the stay, the "disposable" fan can go home with the patient or be discarded. Nurses and Infection Preventionists have found the TREVA solution to be ideal.

5 Inch Desk Fan Model #FD05805

- Tilting base for directional airflow
- Powerful 2-speed fan offers quiet cooling
