THERMEX WATER HEATERS MALTA

www.thermex.com.mt

OUR VISION

At Thermex Malta, our vision is to supply our customers with the most technologically advanced Water Heaters available worldwide.

Thermex was founded in Italy back in 1949 and since then, it grew into a huge multi-national company supplying water heaters all over the world.

Our range of Thermex Water Heaters varies from 5ltrs to 100ltrs in various sizes and models. Thermex offers the best ERP (Energy) Rating on the market.

THERMEX IN MALTA

Thermex water heaters are available for purchase at all of our authorized retail establishments located in Malta and Gozo.

A comprehensive list of these outlets can be accessed on our website, allowing you to conveniently contact the nearest one directly.

If you need additional information, please do not hesitate to reach out to us, and we will be delighted to help address any inquiries you may have.

HIT PRO

Series of compact storage water heaters are suitable for places where you need a small volume of hot water, such as kitchens, workshops and small food and service firms restrooms.

Caring about health.

Bio-glasslined coating reliably protects the inner tank from corrosion and keeps the water clean and fresh.

Easy installation.

A series of compact water heaters includes under-sink and above-sink mounting models, which makes it convenient to place a water heater even in a small space.

Reliability.

Bio-glasslined coating increases the tank resistance to temperature changes, water hammering and microcracks forming during active usage.

Easy operation.

All controls are located on the front panel, which helps to adjust the temperature literally in one motion. Functionality. The light indication informs you about heating mode and switching on of the water heater.

Durability.

A reliable heating element and enlarged anode protects from corrosion and keeps water in water heater clean and fresh.

Ease of use.

The simple mechanical control PRESS & TURN helps to easily use the water heater and changing the heating temperature in one motion.

Economical.

High-density thermal insulation made of polyurethane foam allows you to keep hot water longer without additional waste of electricity.

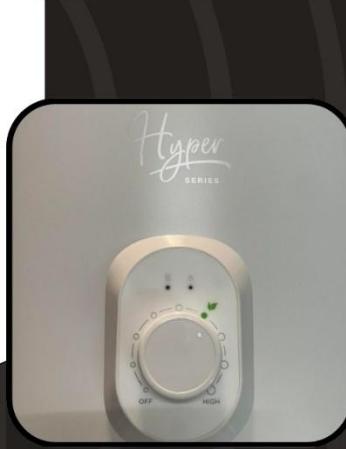

Safety.

Bio-glasslined coating protects the inner tank from corrosion and provides its resistance to temperature changes.

Efficient heating.

The Thermex HYPER water heater uses a durable "wet" TEN for optimal performance in various conditions, including high water hardness. Its high-density Super Foam insulation ensures consistently low heat consumption.

Health care.

The water heater's internal tank features a bioglass-porcelain coating, closely resembling real glass. This thin layer effectively protects the tank from the primary cause of water heater breakdowns: corrosion.

Strong and durable body.

The classic round steel body, in addition to its capacity, boasts strength and resistance to water hammer, which ensures a long service life of the water heater.

Convenient control.

The Thermex HYPER water heater is controlled by a user-friendly, modern mechanical regulator at the bottom.

Self-diagnosis

Space saving.

Water heater is designed with the Double Tank technology.

Due to this technology, the water heater becomes flat and has small dimensions, so it is easy to place it even in a small apartment.

Effective work.

4 programmed heating modes will solve any task given: quick, standard, eco and freeze protection mode.

Safety.

Bio-glasslined coating protects the inner tank from corrosion and provides its resistance to temperature changes.

Touch control panel.

User-friendly interface with indication for heating, switching on and operating modes.

Intelligent control & Design

Modern stylish body in a classic white color with Self-diagnosis and error messages.
