TOWER HILLS RANCH

Welcome to Tower Hills Ranch fall 2024 private treaty kickoff!

We are really excited about this calf crop of bulls that were born between February and May, 2023. As always, we list every bull in the crop, some of which we may keep for either our commercial or registered cows, but all are offered for sale on kickoff day. We fed these bulls a corn ration for 79 days prior to taking their yearling weights and carcass merit ultrasound scans. They were fed a limited ration of 2% of their body weight, and have never been “fat”. They have been run on grass and 8 pounds of 14% cottonseed cake, and will hold up after you turn them out.

Our Angus genetics are heavily influenced with Schaff Angus Valley bloodlines, crossed up with other select northern breeders such as Connealy and Hinman. Our Optimizer bulls incorporate those same lines with the Salers breed as developed by Joe Gibson and updated from MacDonald and GG&T. I really like the hardiness, ranginess, and upgraded maternal traits I see from blending these Angus with these select Salers. Optimizers (Angus X Salers) make a great cross which the feedlots are bidding up for when we sell our steers because they like the hybrid vigor, increased yield, and high percentage CAB. You can get the same genetics from those breeders, but it will cost you 3 times our minimum bid prices, and those over-fattened bulls will fall apart after you turn them out.

This catalog has the minimum bid prices on all the bulls. If you are interested in a particular animal at our minimum bid price you should let us know, with your contact information, before the kickoff. No animals will be sold before kickoff, but at kickoff it is strictly first come, first served. Where multiple customers have expressed interest in the same animal we will call you (if you aren't here) and have a quiet auction between those customers on the list. We are taking \$100 off the minimum bid price for every bull that sells on October 17th.

The bulls are kept close and are easy to show. We encourage you to call Joe or Lance anytime before Kickoff to schedule a personal showing.

2024 Fall Private Treaty Sale Kickoff

Thursday | Oct. 17, 2024 | 10:30a.m.
Tower Hills Ranch | Shidler, Oklahoma

Breeding Guarantee

All sale bulls passed a Breeding Soundness Exam. We guarantee them to be fertile for the first breeding season (3 months following turnout). If a bull fails to settle your cows we will provide either a satisfactory replacement or a credit on a future Tower Hills Ranch animal equal to purchase price less salvage value. Tower Hills Ranch will not replace an animal due to death or injury. We guarantee fertility only. We do ask you to contact us as soon as you discover a failure to breed and within the first breeding season.

Key

Bulls highlighted in yellow (and wearing yellow ear tags) are registered Optimizers registered with the Salers Association. The fraction of Salers blood is shown next to their birth date under their name on each animal. They are all mostly Angus with the fraction of Salers blood ranging from $\frac{1}{4}$ to $\frac{5}{8}$ ths. The bulls highlighted in blue (and wearing blue ear tags) are 100% Angus and registered with the Angus Association.

Be our Guest

Come join us at the ranch on October 17, 2024! Bulls will start selling at 10:30 a.m. on a first come first serve basis.

Bull prices will start at \$2700.00, the full price list is available on page 11.

All cattle can be previewed ahead of time, contact Lance at 208-392-8844

Directions to the Sale Site

5661 Foraker Rd. | Shidler, OK 74652

12 miles west of Pawhuska, OK on HWY 60 (or 7 miles east of the intersection of HWY 60 and HWY 18), then 5 miles north on Foraker Rd.

Females

We offer pick of registered open heifers and 49 commercial females that are not included in this catalog. Check our web page at TowerHillsRanch.com for details prior to the Kickoff. There are 19 commercial heifers AI bred to THR Legacy 714, 15 fall calving first calf heifer pairs and 15 fall pairs.

13.3	-1.0	70	109	25	0.3	0.16	80	594	870

One of the biggest calves on weaning day with a 720 lb. weight. He gained 350 pounds this summer after having been fed corn. He was apparently bitten by a snake and developed a hard abscess under his brisket. It looks weird, but hasn't affected his performance or his breeding soundness.

This bull has been a favorite his whole life. He had a big winter gain, big weaning Weight per Day of Age, the biggest ribeye and near the top marbling on scan day. He is one of the heaviest bulls today, and is very good looking.

18 Month-Old Bulls

If you are interested in a particular bull at our minimum bid price you should let us know, with your contact information, before the kickoff. No animals will be sold before kickoff, but at kickoff it is strictly first come, first served. Where multiple customers have expressed interest in the same animal we will call you (if you aren't here) and have a quiet auction between those customers on the list. We are taking **\$100 off the minimum bid** price for every bull that sells on October 17th.

Contact Joe Bush, owner (918) 629-2554 or Lance Campbell, manager (208) 392-8844 to discuss which bulls you would like to buy.

- This table shows the relative performance information on each bull. They are in order by age, with the oldest bull first and the youngest last. A 3-month spread. All the weights are actual weights on the dates shown above the columns. The performance measures in red highlight the best performers in the respective category. These bulls were fed a corn ration limited to 2% of their body weight for just 79 days (from February 5 to April 25) prior to ultrasounding. They were never fat, but the ultrasound scan should indicate relative carcass merit between the bulls.
- Weaning WDA (Weight per Day of Age) is the animal's weight on October 26 divided by how many days old he was on that day.
- Feed ADG (Average Daily Gain) is the number of pounds gained while on the limited corn ration divided by 79 days. Our steers on full feed averaged 4.7. These bulls would gain at a much higher rate if given all they wanted to eat.
- The grass gain column shows how many pounds they gained last summer on grass AFTER having been pushed with corn. Our commercial steers averaged 350 pounds of gain over the summer.
- Scrotal circumference is shown (in centimeters) because university studies have shown a correlation between scrotal circumference and his offspring's fertility rates.
