TOWER HILLS RANCH

Tower Hills Ranch Spring 2023 Private Treaty Sale!

This is a very exciting time to be in the cattle business. We are on track for record prices for our animals in the foreseeable future, and the genetics you choose today will pay dividends for years to come.

This crop of bulls was fed a corn ration for 109 days last fall, and have been roughed through winter on 12% cubes and grass. They are extremely ready for green grass and will not fall apart during the spring breeding season. The ultrasound carcass report was taken when they came off feed on November 9.

There are several exciting new sires of this calf crop, including AI studs from Schaff Angus Valley, EXAR, and MacDonald Ranches, as well as the best of our own chosen herd sires. You can spend twice as much elsewhere on bulls that won't hold up as well, but you won't find better cattle.

Prices and videos of the bulls are at TowerHillsRanch.com. If you are interested in a particular bull at our modest asking price we encourage you to reach out to us. The private treaty is strictly first come first served.

Joe Bush, owner (918) 629-2554 • Lance Campbell, manager (208) 392-8844 • Erica Campbell, office (918) 350-4531
email: towerhillsranchok@gmail.com • towerhillsranch.com | Find us on Facebook

Breeding Guarantee

All the bulls offered have passed a Breeding Soundness Exam performed by Flying Cow Genetics before kickoff. We guarantee them to be fertile for the first breeding season. If a bull fails to settle your females we will provide one of the following: 1) A satisfactory replacement, if one is available. 2) Credit on a future Tower Hills Ranch animal—equal to the purchase price less salvage value. The “first breeding season” is defined as the first three months (90 days) following the day of turn out. This is not a mortality insurance policy on your purchases. We suggest contacting an insurance representative to inquire about mortality insurance. Tower Hills Ranch will not replace an animal due to death or injury. We do ask you to contact Tower Hills Ranch immediately upon discovery of a failure to breed and within the first breeding season time frame.

Deferred bulls will not be sold until they pass the breeding soundness exam.

Key

Bulls highlighted in yellow (and wearing yellow ear tags) are registered Optimizers registered with the Salers Association. The fraction of Salers blood is shown next to their birth date under their name on each animal. They are all mostly Angus with the fraction of Salers ranging from 1/4 to 3/4. The bulls highlighted in blue (and wearing blue ear tags) are 100% Angus and registered with the Angus Association.

Directions to the Ranch

5661 Foraker Rd. | Shidler, OK 74652

12 miles west of Pawhuska, OK on HWY 60 (or 7 miles east of the intersection of HWY 60 and HWY 18), then 5 miles north on Foraker Rd.

This table shows the bulls in birth date order, with the oldest bulls first. These are actual weights at birth, then on weaning date, yearling date and in March 2023. The weights are not adjusted for age. The bulls were fed a corn ration for 99 days on grass in the fall at 2% of their body weight daily, such that they gained 3.2 pounds per head per day on average. This very limited feed test measures their relative performance on corn without getting them so fat that it adversely affects their health and longevity. They were wintered on native grass and supplemented with 8 pounds of 14% cake daily. They gained an average of 116 pounds each this winter. They are in good condition and will not fall apart while breeding your cows this spring.

One of the two Atomic Force sons in this crop, he only weighed 56 pounds at birth, and gained 370 pounds on feed. Use on heifers or cows. He has a recessive red color gene, so if you are trying to get a black calf out of a red cow, he might not.

Back in Scotland, the Drummond family patriarch was an aristocrat with a 200,000 acre Angus cattle ranch. His "title" was Earl of Perth. I named this bull Earl because he combined my favorite sire with my best producing cow family. He was a super soggy, low birth weight high growth bull that clearly passes those traits down.

He is the easy fleshing breed leader for the Angus breed. He is a stylish calving ease bull.

The Best Hybrid Cross Optimized

The Angus Breed - famous to the world for efficiently producing the best food you can eat. That is why Certified Angus Beef gets a premium price from the packers. That is why black cattle bring the highest prices at every sale barn.

The Salers Breed - hardy beef and dairy breed developed in the mountains of France. They range over the entire pasture every day. They calve easier due to wider pelvises and tapered skulls. They have outstanding maternal instincts and are superior milkers. They are more fertile and live longer than Angus.

We have found that crossing Angus to Salers gives us a more efficient and productive cow herd.

Range Ready Cattle

Tower Hills Ranch is a grass ranch, not a farm. We have raised yearlings on grass out of our commercial cows bred to our registered bulls. We feed our registered cows the same as our commercial cows and select our genetics based on real world performance.

A Win, Win with this Hybrid breed!

Cowmen like having more live calves that grow and sell better. Stocker operators pay more because they grow and sell better. Feedlots pay more because of better performance on feed and higher dollars from the formula. Packers like them because they make great food, and everybody likes great food!
