

### Specification

A small sized submersible stainless steel fitting with a countersink is the perfect accessory for water features, swimming pools and fountains.

The countersink allows it to be flush with whatever surface it is intended for.

Despite being submersible, this fixture offers an array of different purposes dependent on the situation. Countersink fixtures make for great pavers for landscaping such as decking.

The FP-SM3 is ideally used for Endglow fibre: EG1.0, EG1.5, EG2.0 and EG4.0
