

Specification

A large sized submersible stainless steel fitting perfect for water features, swimming pools and fountains.

The countersink allows it to be flush with whatever surface it is intended for.

Despite being submersible, this fixture offers an array of different purposes dependent on the situation. Countersink fixtures make for great pavers for landscaping such as decking.

It also includes an adjustable gland to allow for extra security when fitting the fibre within the fixture. This can be removed for paver application to lower the depth.

The FP-SM7 is ideally used for Endglow fibre: EG12.0, EG25.0, EG50.0 and EG75.0

Technical Information

FP-SM7

Material	316 Stainless Steel
Weight	99g
Size	62.75mm
Mounting Hole Size	26mm
Min. Fibre Size	3.2mm
Max. Fibre Size	9.5mm
