ANYWHERE, ANYTIME.

## Botox

Botox injections help reduce the appearance of facial wrinkles as well as help to treat conditions such as neck spasms, excessive sweating, an overactive bladder, lazy eye, chronic migraines, and more.

## Xeomin

Xeomin is an incobotulinumtoxin - it is known as a "naked injectable," meaning that it only contains botulinum toxin A; no other additives. One of the benefits of a pure-form injectable like Xeomin is that the human body is less likely to become resistant to it.
