

## Advanced Configuration Software

PC-Net-003 allows the configuration of the MxPro 5 series fire panels, and is equipped with the latest programming options expected from a modern fire control panel.

In addition to the standard configuration options the package allows sophisticated cause-and-effect, variable sensitivities and time critical settings to be defined. The software also has a Virtual Panel display, supports remote diagnostics and allows flexible connection either directly or via modem for all of the functions.

### Features

- Allows full configuration of the MxPro 5 panels and network
- User-friendly Windows based software
- Virtual panel display
- Supports remote diagnostics
- Assistants menu to check your design and configuration
- Panel branding via electronic logo
- Service Tool for predicting false alarms and providing customised end user reports

### Order Codes and Options

Pc-Net-003:	MxPro 4 & 5 Series Configuration Software & Lead
Pc-Net-003-USB:	MxPro 4 & 5 Series Configuration Software & USB Upload/download Lead
Pc-Net-004 :	MxPro 4 & 5 Series Remote Dial-up Software
Pc-Net-005-L1 :	Mx Graphical Control Software (up to 3 Node Connection)
Pc-Net-005-L2:	Mx Graphical Control Software (up to 15 Node Connection)
Pc-Net-005-L3:	Mx Graphical Control Software (up to 200 Node Connection)

## Compatibility

BMS/Graphics Interface will be required for interfacing the MxPro 5 panels to a graphical PC.

### **PC-Net-003 MX Pro configuration Software**

PC-Net-003 is a powerful, windows based tool to allow programming of the advanced Cause and Effect options available on the Mx-Pro series fire alarm control panels.

### **PC-Net-004 MX Terminal Dial Software**

PC-Net-004 is a stand-alone PC based virtual panel control and display package for either direct or remote connection to a Mx-4000/5000 series fire panel.

### **PC-Net-005 Mx Graphics**

The Advanced Pc-Net Graphical Control System is highly configurable so that the end user can be presented with site maps, text and images in order to monitor the full fire system. Isolation status and analogue values are available by simply selecting icons and devices.

Powerful graphical control and indication with historic log and analysis features providing instant report by date/time as well as event type, sensor address and operation.

### **PC-Net-007 Mx Logo Programmer**

PC-Net-007 allows the installers logo to be uploaded to the panels graphical display for simple branding of the panel.

### **PC-Net-015 Mx Service Tool**

PC-Net-015 is a windows based PC application, allowing the retrieval of analogue values, panel meter readings and event logs from the Mx control equipment in order to provide customised reports service and maintenance as well as the end user (meter reading and event logs not available on Mx-Pro 4)
