Solutions Through Innovation

sOft Touch

SoftTouch table service combines the rich look of high resolution **custom floor plans** with comprehensive functionality ranging from quick order entry and instant check printing to full fine dining coursing. Multiple custom floor plans provide coverage for the entire facility at the touch of a button.

Powerful seating functions support multiple checks for community style seating. Combined with instant seat-to-seat reassignments and floating dining customers, virtually all of your dining challenges are easily overcome.
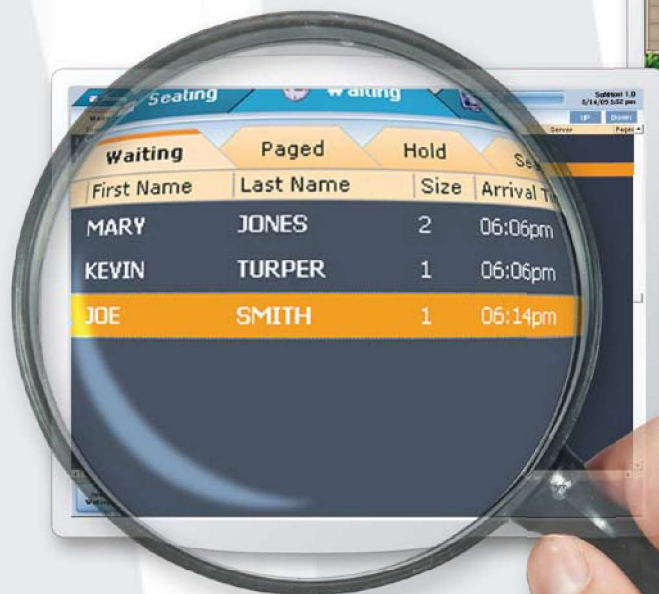

Full coursing functionality provides automatic course separation along with manual and scheduled hold and fire capabilities.
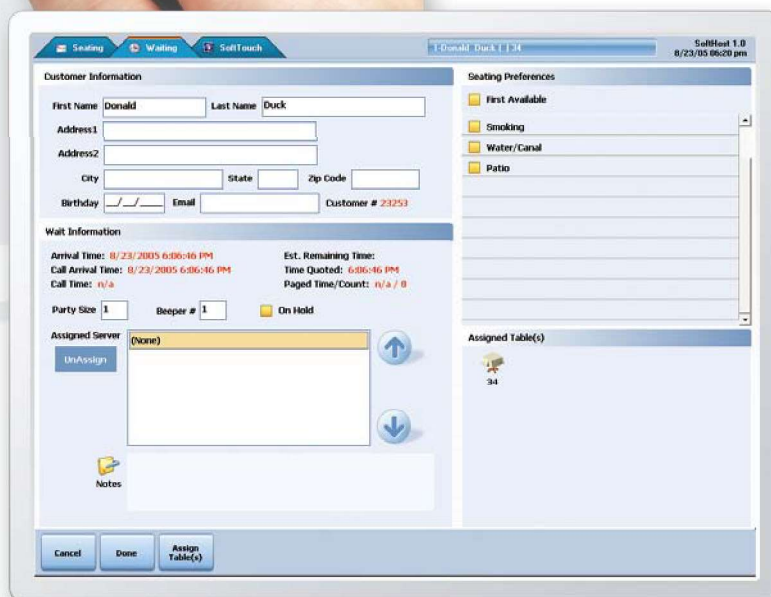

Guest seating is elegantly managed with SmartHost™. The custom floor plan provides a full view of every table along with valuable details.

Reservation functions and same day call-ahead lists display important guest information such as arrival time and seating preferences.

The fully integrated **paging system** notifies the assigned server and waiting guest when a table is available.
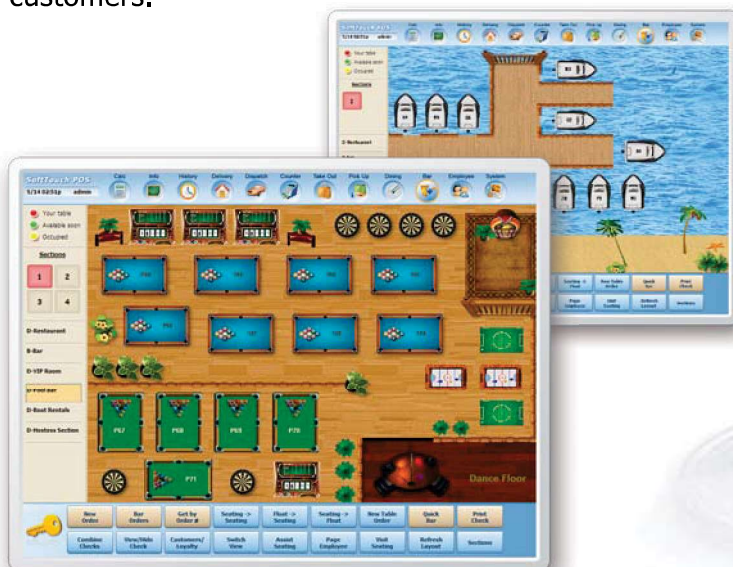

Starting with a custom floor plan, the bar is easily managed at a glance. The convenient lock down mode, combined with the fast cash send option, allows drink orders in as little as **two screen taps**. For multiple bar hosts, the powerful one touch logon creates superb efficiency when placing orders.

Instant seat reassignment and **floating bar customers** are fully supported to simplify customer tracking.

The last round order can automatically exclude food items to make reorders quick and easy for all customers.
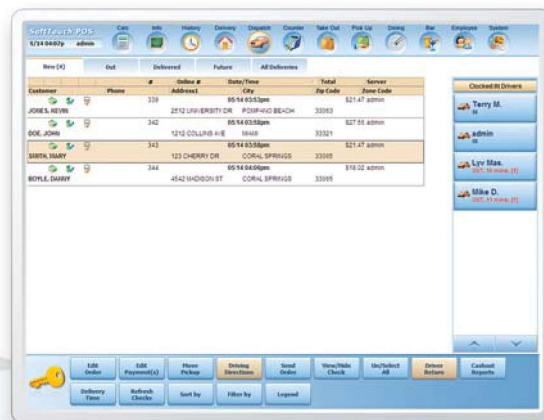

From pool tables and dart boards to personal watercraft, all of your **equipment rentals** are automatically timed and easily managed directly from the custom layout.
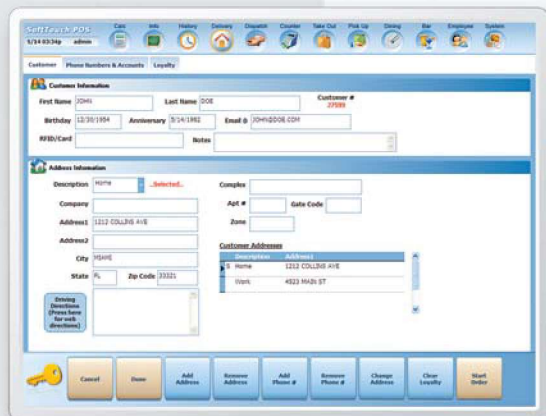

Quick service provides simple and intuitive controls for Counter, Take-Out and Delivery functions.

Configurable order timeout indicators help ensure on-time deliveries.

Advanced features such as customer names on orders and suspending orders before cash out make counter operability practical for real-world scenarios.

Multiple phone and address support consolidates customer information, eliminating duplicate entries.

Schedule based delivery charges combined with zip code ranging and online **mapping** interface provides essential tools to an efficient delivery service.

Video Monitor Integration

Fully integrated video monitoring system displays server activity with on-screen transaction details providing a powerful anti-theft solution.

House Accounts, Gift Cards, Card Accounts

Charge and maintain customer balances with full statement reporting. Create on-demand gift cards that can be used at multiple stores.

Handheld and Mobile Ordering

This innovative SoftTouch series provides a collection of solutions for table-side ordering and customer self-service. SoftTouch iPOS Handheld Ordering solution is a low-cost, highly functional mobile ordering solution for wait staff. Based on the WiFi enabled Apple iPod Touch or iPad platform, this product offers excellent mobility for on-premises ordering. SoftTouch iTable and iKiosk are Apple iPad-based table or pedestal mounted solutions for customer self-service; an intuitive user interface steps customers through a guided order entry and payment process. For on-the-go customers, DineBlast Mobile provides a convenient self-ordering solution that works on virtually all SmartPhone devices from any place and any time.

SoftTouch Cash Management

SoftTouch Cash Management strikes the "perfect balance" between security and workflow efficiency for daily sales operations. A simple-to-operate control panel easily manages employee closeouts, paid-in/outs and cash transfers. Daily sales revenue flows effortlessly from POS stations and servers to a designated depository or store safe making end-of-day balancing fast and secure.

Food Costing Interface

Optional interface to Trac Rite food costing system provides valuable information about item level pricing as well as portion control.

Enterprise Reporting Solution and SQL Database

A comprehensive web-based end user enterprise solution* provides real-time data replication and aggregation for reporting, alert monitoring and centralized menu control.
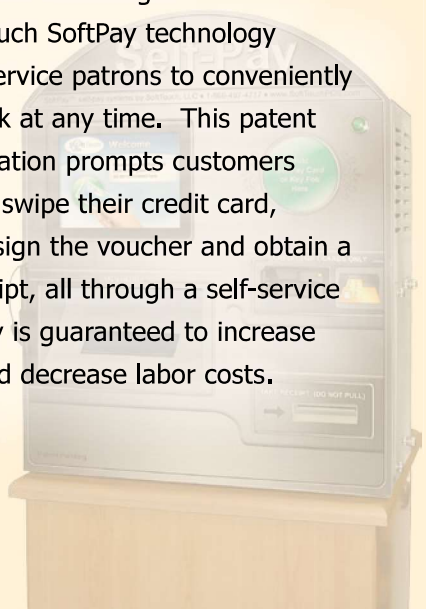

Online Ordering (DineBlast)

Customer self-service dominates new technology trends and Online Ordering is amongst the highest ROI solutions available. Customers can place their orders from virtually anywhere using a Desktop PC, SmartPhone or any browser based mobile device with Internet access. Online ordering is proven to reduce labor costs and increase per-ticket average sales.

Self-Pay

Need to pay your check right away? SoftTouch SoftPay technology allows table-service patrons to conveniently pay their check at any time. This patent pending innovation prompts customers to leave a tip, swipe their credit card, electronically sign the voucher and obtain a hardcopy receipt, all through a self-service kiosk. SoftPay is guaranteed to increase table-turns and decrease labor costs.

Authentication Technology

SoftPay Touchless Sign-On is the world's fastest and most reliable authentication technology in the POS industry. This virtually indestructible solution instantly recognizes authorized users without ever swiping a card or scanning a finger. Touchless Sign-On combines the best security with the fastest performance. Conventional Biometric security is also fully compatible with SoftTouch POS.
