CATCH, PHOTO & RELEASE (CPR) TOURNAMENTS

Every PMTT tournament will be a Catch, Photo & Release (CPR) tournament. Every tournament boat MUST have a digital device/camera capable of taking a clear photo operated by the contestants that catch the musky and MUST have an actual bump board (NOT A RULER OR MEASURING STICK), so your fish can be immediately released after the photo is taken, without delay. The digital device/camera should have the ability to text the images taken to the tournament director. In the event the angler does not have the ability to text the image, then they must have a digital camera with the ability to record the images to a removable SD memory card which must be handed in to the tournament official at checkout each day. All anglers must voluntarily submit all digital devices used for photos and or texting any tournament registered fish to the tournament director upon request. All fish photos and texts submitted during a tournament may not be deleted from the device used to take and submit them until the day after the final day of the tournament. Failure to comply will result in any entry fees and prizes being delayed, forfeited or revoked.

As soon as you catch a fish and right after you have released the fish, you must call for a PMTT official, either by cell phone or designated channel (10) on the marine band radio. Make sure you can see that the nose is touching the front of the board and that the tail & PMTT issued sticker for that tournament is in clear view. If the PMTT official cannot clearly read the measurement or sticker, they will make their best determination and that decision will be the final measurement. The fish may not count - if the official cannot see the picture at all, the sticker, the fish's nose appears to not be touching the front of the board and the measurement is close or there is no picture at all.

The PMTT officials must be able to clearly read the measurement. Check your digital device/camera to make sure you can clearly see the measurement. Release the fish after photographing it clearly with the device/camera on the bump board. The safe release of all fish is of utmost importance. The angler will immediately text all photos required for acceptance to the tournament director for determination. The director will then reply back with acceptance or denial of the registered fish. This will be explained in great

detail at tournament central during the mandatory rules meeting held on the afternoon prior to the first day of tournament fishing.

TOURNAMENT SCORING

- 30 (thirty) points for a 34 (thirty-four) inch fish. (Size limits and points will be adjusted higher or lower on some lakes with different size limits and regulations.)
- 1 (one) additional point for each 1/4 (one-quarter) inch over said size limit.
- Any measurement falling "between" 1/4-inch marks shall be "rounded down."
- In addition, there shall be 10 (ten) BONUS points for a "GOOD RELEASE." A "good release" is defined as a musky released "upright and healthy."

Once a musky is caught, keep the fish in the water (either in the net or livewell). DO NOT put a fish on the floor of your boat. There shall be no further fishing by either Team member, until the Judgment of that fish is complete, and the release completed. Measurement may be taken with the fish's tail "pinched."

There shall be a TEN-POINT DEDUCTION from the points scored for a fish that dies, in addition that team will also not receive the 10-Point "Good Release" Bonus. Should a fish die, that contestant shall be done for the day and the fish must be taken immediately to Tournament Central or a designated checkpoint before that contestant's partner may resume fishing. The other team member may continue to fish thereafter. The contestant that is done may assist his partner but MUST NOT be observed with a fishing rod of any kind in his hands, nor shall there be more than one fishing line in the water.

All teams are responsible for texting their photos, at the time the fish is caught, to the tournament director or turning in their fish forums and SD cards at the end of each day's checkout procedure on the water. Failure to text your photos or turn in your fish forums and SD card at the end of the day checkout procedure on the water will result in those fish not counting for the tournament that day.

TOP GUN AND RANGER BOATS WORLD CHAMPIONSHIP QUALIFICATION

Top Gun and Ranger Boats World Championship qualification scoring shall be as follows.

1. The 1st Place team at any event receives 150 standings points. Each subsequent place receives one fewer standings point. (For example: 2nd place receives 149 points, 3rd place receives 148 points, etc.) Standings points will only be awarded for teams that place in an event by catching a legal fish. (i.e. if there are only 25 teams that catch legal fish, all the remaining teams shall receive no standings points.)
2. Each team will also receive 10 attendance points for competing at each event.
3. Failure to catch a fish at an event will result in contestants receiving only 10 attendance points and zero standings points.

The top 40-point teams, based on the Top Gun scoring system, accumulated throughout the year will be invited to compete in the Ranger Boats World Championship. To be eligible, you must have fished in at least two or more of the qualifying events and have registered at least one musky during one of the qualifying events, to be eligible to attend the Ranger Boats World Championship.

3-Day Fishing format for the Ranger Boats World Championship tournament. You must catch and register at least one 30" musky during the first 2 days of competition to be eligible to move on and compete in the third and final day. Everyone registering at least one 30" musky and is moving on to compete in the third and final day will carry over all of their points from the first two days. The total points accumulated from all three days shall be the winners.

The starting positions for the Ranger Boats World Championship will be determined from the annual point standings. Whatever number you finish in the point standings after the last qualifying tournament will be your starting position for the Championship. It will be reversed on day two and then go back to the day 1 order for the teams remaining on the final day.

The qualifying event winners will not get an automatic invite to the championship. The event winners will be invited to compete in the championship only if they have competed in at least two of the qualifying events. They DO NOT need to be in the top 40 teams to receive an invite.

In case there is a tie for the last spot (#), all tournament anglers that are eligible and are tied for the last spot, will be invited to the Championship. Yes, this would mean there could be a couple more than teams total.
