Who Is Shame Penguin?

Shame Penguin brings an anything goes adventurousness to their songwriting. Like every band on the Internet these days, they've got an audible reverence for iconic acts of the 90s, but they are musically omnivorous. You might hear anything from noise pop to J-rock in the record collection, and their appreciation of the classics means they are pulling from a pretty deep bag of musical tricks.

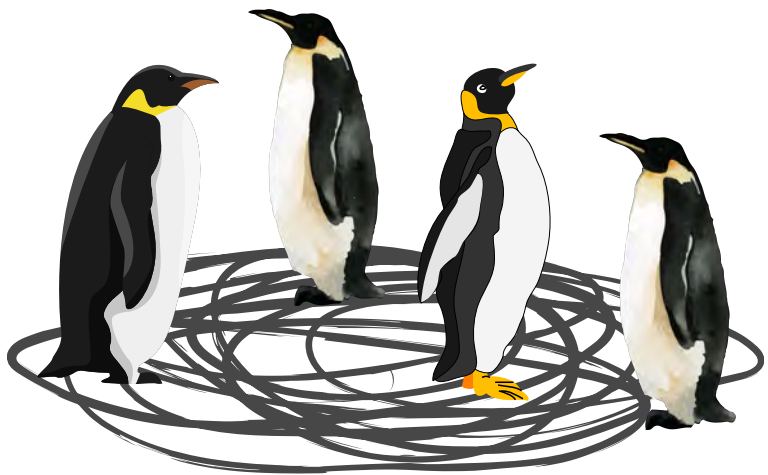

Their songs are tense, sometimes angry, and often righteous. But fundamentally, this band wants to be kind. These guys may be singing songs about personal and societal harm, but you are more likely to notice hugs and smiles at a Shame Penguin show than most of their contemporaries. The band's brotherhood shines through their music, guitar and bass parts that come alive in response to each other. The rhythm section meld a groove so steady that you could land an airplane on it, and with multi part vocals that come together like Voltron.
