WHAT IS MAXUS INTELLIGENCE ONBOARD?

This is a programme offered by LEVL and powered by the Geotab telematics platform, which allows EV fleets to better optimise and monitor their vehicles to ensure they are operating productively.

Who are LEVL and Geotab and what do they do?

LEVL are the UK's leading value-added Reseller of Geotab. Using the GO Device which plugs into a vehicles OBD II port, and the web-based myGeotab Fleet Management Software, this empowers business decisions using world leading technology.

Join over 2 million connected vehicles worldwide and contact us today!
