

TEAM WORK IS THE KEY TO SUCCESS

MISSION STATEMENT

TIGER is committed to a construction process, which places the health and safety of all project personnel as the ultimate priority.

It is our intent to build a quality product and in the process sustain ZERO accidents. In order to achieve ZERO accidents, TIGER and its subcontractors will thoroughly plan all work activities, practice sound communication, continually monitor the work place for hazards, and take prompt action to correct or remove any known hazards.

TFS is structured to focus on safety awareness of potential hazards and foster procedures, which will prevent accidents. No work is so important as to allow for and / or disregard of safe work practices.

We intend to identify and communicate guidelines to ensure our safety, and a sound environmental performance through the planning and construction stages of every one of our projects.

TIGER is uniquely positioned to meet your project requirements. We have the advantage of responding with a full range of integrated fabrication, and installation services through our companies and subcontractors, which give us the advantage of providing multi-disciplines with one management team.

We must strive to be a leader in our industry and our community. The Company and its employees have an obligation to participate in worthwhile industry and community activities. Additionally, active participation in the political process is imperative if we are to maintain the "Free Enterprise System" that has so effectively provided the opportunity for businesses such as ours to flourish.

REGARDS,

STEVE SCRUGGS

" WHERE WE KNOW, IT CAN BE DONE BETTER"
