

Safe instructions

How to reset the safe to own user code

1. While the Safe door is open – press the red button on the inside of the door
2. The yellow LED light will flash and beep – please input your own code (within 30 seconds timeframe)
3. Code should be 3 – 8 digits, then press A or B to finish
4. If the yellow light keep on flashing the code is wrong – repeat steps 1 – 3

Please remember your own code and remember to leave the safe open on the day of departure.

If you forgot the code, please ask for assistance to override the code.
