The 4th Annual Fall

"PARTNERS IN PROGRESS" BULL & FEMALE SALE AT

McEntire Red Angus

MONDAY, OCTOBER 5, 2026

1:00pm | Sweetwater, Oklahoma

McEntire Red Angus

Randy, Crystal, Chloe and Rance McEntire

Pam McEntire | Randy: 580-729-9036

MCENTIREREDANGUS.COM

Welcome, friends and neighbors, to our 4th Annual Fall "Partners in Progress" Production Sale at McEntire Red Angus! We hope you know how much we appreciate everyone who supports our program. By offering a selection of bulls and females in the fall, we hope to welcome some new faces to the ranch as well. We love the cattle business and, even more, the families it brings to our ranch. It is what we do day in and day out.

We are excited about the group of bulls and females we have for your appraisal. These bulls represent the younger end of our calf crop and have been developed right here at the ranch. We will be selling a nice set of herd bull prospects that we feel will make a great addition to either a seed stock producer or a commercial cattle operation. We will also be offering 50 commercial pairs, 50 commercial fall bred heifers, and approximately 88 spring bred heifers from some of our bull customers. The entire sale offering has been on a complete vaccination program. The bred females will be preg checked by Dr. Richard Prather one week prior to the sale.

We understand that the Red Angus breed is becoming more and more popular and that you have many options when it comes to choosing your herd bulls. We invite you to come out to the ranch, look over the bulls and heifers, and hopefully find something that will bring value to your operation and help move your program forward. Good bulls make great cows, and our mating decisions have been based on producing next-generation females that are more efficient and productive than their mothers. Red Angus cattle are known for their good dispositions, calving ease, adaptability, and ability to help keep your operation in the black! A good set of Red Angus tagged calves will top the sale no matter where you go.

We would like to invite you to come out to the ranch on Sunday night before the sale to enjoy supper and a social. We would love the opportunity to get to know you and your family! We will eat around 6:00 pm at the main house, located just around the corner from the cattle pens. Please join us on sale day at 12:00 pm for lunch. The sale will start promptly at 1:00 pm CST. Again, this year the sale will be broadcast live on CCI.Live for those of you who are unable to attend in person. If you have any questions about the sale, please feel free to contact us or any member of the sale staff to visit about the offering. Be sure to check out our website at www.mcentireredangus.com to view videos of all the lots in the sale. We will not sell in catalog order this year. Therefore, please be sure to check our Facebook page or CCI.Live for the sale order on sale day.

Thank you for your interest and continued support. We truly appreciate the opportunity to do business with you and look forward to welcoming you and your family to the ranch.

See you at the sale!

Randy McEntire

Optimism is a welcome and fresh term for the beef industry! This market began to brew over two years ago, and it continues to surge and set records daily from coast to coast and border to border. Enthusiasm among producers is extremely contagious, as most all have received more for their work and investment than at any other time in their lives. The daily discussion among producers is making the investment in the next generation genetics and setting out to improve through their genetic acquisition instead of getting by with the traditional status quo price restriction. Several of those producers will turn to family outfits like McEntire Red Angus to take that next step in the right direction and rightfully so.

Randy and Crystal have stepped the operation up another level through key genetic acquisitions in herd sires over the past couple of years. The infrastructure at McEntire in terms of facilities also ramps up so that they can serve their current customer base and add numbers in the future to give bigger ranching entities the peace of mind by offering the same quality in volume. The roots of this outfit would be strong and deep with a commercial focus, and that's why they keep making the trip to the metroplex of Sweetwater, Oklahoma.

The focus has always been to offer a product in a red hide that can improve any program, commercial, or seedstock. Searching for and acquiring the genetics that keep the program moving forward is a constant process. Randy has done a great job of keeping the cow base like in kind and genetics. Each year, pressure is applied to make sure the female base is tough enough to withstand the volatile environmental pressures of Western Oklahoma. An environment that can be the hottest and driest place on the continent or host a record blizzard with sub-zero wind chills for an extended time. The cattle must be low-input and self-sufficient, yet are also expected to produce large, market-topping calves, and/or the kind of herd bulls that sire premium-bound progeny with the performance and conversion to give that respective producer the reputation for having the goods.

As always, the McEntire family has put their very best foot forward as they have assembled a very top notch set of seed stock for your appraisal. The bulls offer so much advancement for genetic improvement as well as being saturated with eye catching phenotype. If you're in need of adding females to your outfit, these leading ladies will remove the fear factor of investing after you set your eyes on the undeniable quality they have to offer. Performance-charged, maternally driven cattle with the longevity in skeleton and reproductive fundamentals to catapult your operation into the next level above tax bracket. Quite possibly the very best part of this offering is doing business with the family that backs the product!

The McEntire's are a prime example of the good folks of the industry. Hospitality is their forte, food is a mastered craft, and the stock then becomes secondary. This is your invitation to join us for great cattle and great people at the Sale Facility on the ranch of McEntire Red Angus for their 3rd Annual Fall "Partners in Progress" Production Sale. Please do not hesitate to reach out to any of the McEntire team or Innovation AgMarketing for assistance with purchases or requesting pre-sale information. We hope to see you all at the sale!

SALE ORDER

Cattle WILL NOT sell in catalog order this year. A sale order will be available prior to the sale.

TERMS & CONDITIONS

Cattle sell under the standard terms and conditions as recommended by the Red Angus Association of America.

SEMEN INTEREST

McEntire Red Angus will retain 1/2 semen interest in all bulls sold.

SEMEN TEST

All bulls will be semen and Trichomonas tested prior to the sale and are guaranteed to be fertile.

INCENTIVES

Free delivery on bulls within 300 miles of the ranch. This does not include heifers. All trucking on females is the buyer's responsibility, but we will be glad to assist with trucking plans. If bulls cannot be taken sale day or arrangements have not been made with us within the first week for delivery, the seller can house bulls at McEntire Red Angus until pick up at a rate of \$6/day. However, we will not be responsible for sickness or injury.

LIABILITY & ACCIDENTS

Every precaution will be exercised to protect the safety and comfort of those attending the sale. Neither the owners, auctioneer or any sale staff assume any responsibility in this matter and disclaim any liability, legal or otherwise, in the event of accident or loss of property. All persons attending the sale do so at their own risk. We are not responsible for typographical errors.

GUARANTEE

All bull are guaranteed by insurance only. McEntire Red Angus will pay 30% of the insurance premium on each bull purchased in the sale if the buyer chooses for the first year after purchase date. Insurance will be available for purchase on sale day. We strongly recommend purchasing insurance so that your investment is properly protected.

HERD HEALTH

All cattle sold through the sale are on a complete health program and will be accompanied by the health papers for shipment anywhere in the United States.

- The first of two elite ET flushmate heifers that we will proudly offer CHOICE between on October 5, 2026! Whichever female is not selected will be retained in herd at McEntire Red Angus to carry on the tradition of the famed PIE Rosie 2232 donor.
- 4MC Rosie 5260 offers an intriguing combination of pedigree strength, breed-leading growth and added carcass merit. She is a daughter of J6 Maxed Out 121G, the WEBR Maxed Out 627 son backed by J6 Tempest B300, giving her a proven Red Angus pedigree on the topside.
- The maternal side may be equally impressive. Her dam, PIE Rosie 2232, is sired by LSF SRR Identity 0295H and traces to PIE Rosie 004, stacking another generation of the highly regarded Rosie influence into this pedigree. It is the kind of maternal foundation that adds confidence to her long-term potential as a breeding piece.
- Numerically, 5260 separates herself with exceptional growth. She ranks in the top 2% of the breed for WW, YW, ADG and CW, combining that added performance with top 3% Milk and REA. She also ranks top 19% HPG, top 21% GM and top 22% CEM, giving her a well-rounded collection of economically relevant traits.
- A female with this much growth, maternal strength and numerical horsepower deserves serious consideration as a future donor candidate. The combination of J6 Maxed Out 121G, LSF SRR Identity 0295H and the PIE Rosie maternal line gives 4MC Rosie 5260 the genetic foundation to build around for years to come!

PIE ROSIE 8011

- The next option is Lot B, 4MC Rosie 5261, another dynamic female that is backed by the influence of the prolific PIE Rosie 2232 matriarch.
- Of the two ET flushmate sisters from the PIE Rosie 2232 donor, 4MC Rosie 5261 is the stouter, soggier-made female of the pair. She offers an abundance of center body, added substance and a powerful brood cow look while still maintaining the balance and structural quality needed to make her a valuable breeding piece.
- Her numerical profile is equally impressive. She ranks in the top 2% for WW, YW, ADG and CW, top 3% for Milk and REA, top 19% HPG, top 21% GM and top 22% CEM. A 93 WW EPD and 157 YW EPD give her exceptional growth credentials, while 34 Milk adds maternal value and her 54 CW and 0.59 REA figures provide additional carcass strength.
- For those who prefer their females with added volume, substance and a broodier build, 5261 should rise to the top of your list. She combines the stoutness and capacity cattlemen appreciate with an elite growth profile and the genetic backing of the PIE Rosie 2232 donor, making her an exciting prospect to develop into a front-pasture female and future donor! Pick your poison, we love this pair of heifers and are excited to offer choice and privilege on October 5, 2026!

- Few pedigrees in the offering carry more McEntire history than 4MC Groundbreaker 5173E. This son of PIE Groundbreaker 2036 combines fresh outcross genetics with one of the cornerstone maternal lines in the program.
- He is a maternal brother to the \$210,000 valued 4MC King of the Cowboys 706 and is backed by the cornerstone donor 4MC Hvywt 5163.
- The black-red carrier stud, PIE Groundbreaker 2036, has taken the McEntire Red Angus program forward, bringing added growth, carcass merit and a fresh genetic package to the equation.
- He ranks top 6% CW and top 29% REA.

- Check out this black-red carrier stud!
- 4MC Groundbreaker 508 fits the commercial roots of McEntire Red Angus with a balanced genetic package built to add value where it counts.
- As a paternal brother to the \$400,000 PIE Hollywood 222, PIE Groundbreaker 2036 offers a rare outcross pedigree, and his progeny at McEntire Red Angus have combined genetic horsepower with the kind of practical build the program demands.
- His individual record backs the pedigree with a 107 ADG ratio, 115 IMF ratio, and 103 REA ratio.
- He ranks top 4% CW, top 7% WW, top 7% YW, top 7% ADG, top 9% GM, top 12% MARB, top 19% CEM, top 21% MILK, and top 29% ProS.

4MC GROUNDBREAKER 5144E

- Put a star beside 4MC Groundbreaker 5144E if pounds and pedigree are priorities. He is one of the true scale leaders of the offering and is backed by genetics with a long track record at McEntire Red Angus.
- The PIE Groundbreaker 2036 cattle have consistently read with extra performance and end product value, making this sire group an important part of the next generation.
- NUMBER 3 adjusted weaning weight bull in the offering at 750 lb. NUMBER 2 adjusted yearling weight bull in the offering at 1,447 lb.
- The visual stretch and growth he shows matches what is on paper. He ranks top 3% CW, top 4% WW, top 4% YW, top 7% GM, top 7% ADG, top 10% REA, top 21% MARB and top 33% YG.

4MC GROUNDBREAKER 559

- Balanced, practical and backed by proven genetics, 4MC Groundbreaker 559 gives stockmen a versatile option to move the next calf crop in the right direction.
- Tracing back to the black hided stud Connealy Confidence Plus, 559 has added length while still packing a punch.
- Yearling performance is a strong point, as he posted a 1,376 lb. adjusted yearling weight that ratioed 108.
- He ranks top 1% WW, top 1% YW, top 1% ADG, top 5% CW, top 15% REA, and top 18% GM.
- Where pounds pay, he's writing the checks!

- 4MC Groundbreaker 584 offers a useful blend of calving ease genetics and practical cowherd value, giving ranchers another flexible option in this offering.
- 584 combines calving ease with added growth and maternal function. Calves out of first calf heifers should not be singled out with 584 on the roster.
- He came to the weaning pen with a 102 weaning ratio, adding real-world proof to the genetic package. Carcass data adds another useful dimension, highlighted by a 4.15 IMF ratioing 112.
- He ranks top 6% CED, top 11% MILK, top 12% BW, top 13% CEM, top 15% WW, top 16% STAY, top 25% YW, and top 31% MARB.

- The bottom side pedigree deserves attention. His dam, 4MC Sure Thing 2198, is a maternal sister to the \$24,000 4MC Prowler 3190, selected by Blairswest Land & Cattle in the 2024 fall sale.
- Yearling performance is a strong point, as he posted a 1,370 lb. adjusted yearling weight that ratioed 110.
- He ranks top 12% ADG, top 17% CED, top 17% YW, top 17% CEM, top 20% MARB, top 24% WW, top 27% GM, top 28% BW, top 30% CW, and top 32% MILK.

Lot 7

**4MC COMPLETE 5106**

- 4MC Complete 5106 offers the dimensional shape and power needed in today's industry in a package that is smooth and attractive.
- PIE Complete 1668 has become a dependable source of body, substance and robustness for the McEntire firm, traits that translate well to cattle expected to work in real-world environments.
- Yearling performance is a strong point, as he posted a 1,256 lb. adjusted yearling weight that ratioed 101. Carcass data adds another useful dimension, highlighted by a 15.66 in. REA ratioing 108.
- He ranks top 18% STAY, top 19% HB, top 24% ProS, top 35% ADG, and top 35% HPG.

PIE COMPLETE 1668
SIRE OF LOTS 7-16

Lot 8

**4MC COMPLETE 5233**

- Here is a herd sire prospect for cattlemen who study the whole page. 4MC Complete 5233 combines useful breed predictors with a soft body and low input build.
- Yearling performance is a strong point, as he posted a 1,312 lb. adjusted yearling weight that ratioed 106.
- He ranks top 16% STAY, top 22% CW, top 23% YG, top 25% ProS, top 25% HB, top 31% ADG, and top 32% REA.

- Balanced, practical and backed by proven genetics, 4MC Convey 5180E gives stockmen a versatile option to move the next calf crop in the right direction.
- PIE Convey 7058 has proven useful on both sides of the fence at McEntire Red Angus, leaving herd sire prospects as well as the kind of functional females that earn their keep.
- 4MC Convey 5180E is a stout herd sire that has the genetic backing to fit a program with a marketing strategy centered on cattle with the hide off.
- He ranks top 5% DMI, top 28% YG, top 33% GM, top 34% MARB.

- 4MC Chisum 5225 starts the WEBR Chisum 229 sire group with legitimacy. WEBR Chisum 229 has established himself at McEntire Red Angus as a sire of rugged, useful cattle, and this son adds a strong carcass component to that proven foundation.
- This darker red bull comes big footed and stout boned and matches that extra punch with added body and a big hip. His power pieces still blend into a package that is attractive and reads like a quality herd bull.
- He finished with a 1,337 lb. adjusted yearling weight that ratioed 105, then added a 4.27 IMF scan that ratioed 115.
- On paper, he ranks top 7% CW, top 25% DMI, and top 26% GM.

- Few bulls in this section attacked the weaning scale like 4MC Chisum 5190. He recorded a 700 lb. adjusted weaning weight with an impressive 116 ratio. The muscle followed the pounds, as his 15.59 in. REA ratioed 107.
- His tangible performance gives this herd sire prospect additional merit for cattlemen focused on producing stout, marketable calves.
- He ranks in the top 23% for MILK.

- 4MC Hard Drive 585 offers the influence of Bieber Hard Drive Y120 and matriarch of Holton Cattle Company, C-Bar Stony 720E. Holton Hard Drive 2007K ET was used across a select group of McEntire Red Angus females, creating a sire group designed to blend fresh genetics with the function, fertility, and longevity demanded in the McEntire cowherd.
- His dark red color and practical, soft body type make him an easy bull to consider for operations that place a premium on functionality and cowherd value.
- Breed rankings place him top 5% DMI, top 16% YG, top 17% STAY, top 21% MILK, top 26% ProS, top 30% GM, top 33% HB, and top 34% MARB.

- 4MC Hard Drive 5107 is built and bred for female generation. In addition to the maternal influence found in his sire, he carries the backing of the McEntire Red Angus poster child, 4MC King of the Cowboys 706.
- His genetic indicators center on longevity, maternal merit and efficiency.
- There is no doubt you will be keeping all his daughters!
- Numerically, he lands in the top 5% STAY, top 8% HB, top 12% DMI, top 17% ProS, and top 23% MARB.

- The last of the impressive Holton Hard Drive 2007K ET sons is no slouch and brings as impressive actual performance data as any of the paternal brothers.
- He tied for the NUMBER 3 adjusted yearling weight in the offering at an impressive 1,432 lb.
- That level of postweaning performance gives pounds-conscious cattlemen a strong option from a sire group that also carries useful maternal and carcass predictors.
- His percentile package features top 5% STAY, top 6% ProS, top 10% GM, top 10% MARB, top 14% HB, top 14% DMI, top 23% ME, and top 34% YG.

- 4MC Fullback 5128 is a calving ease stud that doesn't make you sacrifice growth and maternal merit.
- With the influence of some of the best from Pieper Red Angus like PIE Fullback 7005 and PIE New Territory, predictability is built into the pedigree.
- From a percentile standpoint, he sits top 12% CEM, top 14% HB, top 16% STAY, top 18% CED, top 27% HPG, and top 34% DMI.

- Few bulls in the offering are built around maternal indexes as strongly as 4MC Fullback 530. He comes with phenotype that matches, with a soft body type and flexible structural build.
- 4MC Fullback 2224 is an in-house sire whose first progeny have displayed the body, structural integrity, and functional build McEntire Red Angus wants to multiply.
- His genetic profile is highlighted by top 1% HB, top 1% STAY, top 6% ProS, top 18% ADG, top 27% YW, and top 28% ME.

PIE NEW TERRITORY 523
3RD GENERATION PATERNAL GRANDSIRE OF LOTS 46 & 47

4MC FULLBACK 522

- Here's another 4MC Fullback 2224 son with length, stretch and performance. 4MC Fullback 522 brings a build the most critical cattlemen would tie into.
- He will answer the call of adding payweight and quality to the next calf crop.
- He ranks top 23% YG, top 34% ADG, and top 35% YW.

4MC FULLBACK 5238

- Carcass traits, muscle, and proven pedigree give 4MC Fullback 5238 a useful combination for stockmen who study both the bull and the generations behind him.
- His 14.63 in. REA ratioed 101, adding individual muscle data to a genetic profile already strong for CW and REA.
- With the backing of 9 Mile Franchise 6305 on the bottom side of the pedigree, you will be glad to have his heifer progeny around as well.
- He earns top 9% MILK, top 15% CW, top 15% REA, and top 29% HPG.

- Building productive females will be the legacy 4MC Blockout 507 leaves behind in a cowherd. His genetic profile leans heavily toward longevity and maternal value, two traits that keep paying after the first calf crop is gone.
- 4MC Blockout 976 has developed a reputation through daughters that are functional, attractive, and built to stay in production, making this big scrotal son especially relevant for stockmen retaining replacements.
- He ranks among the top 4% STAY, top 8% HB, and top 22% DMI.

THE COMMERCIAL PAIRS/BRED HEIFERS

We are proudly offering approximately 100 fall calving commercial Red Angus first calf heifers.

These females will be sorted into groups of 5 based on calving dates. Information will be provided the week of the sale. The majority of these females will be calved out.

For more information, please contact Randy McEntire at (580) 729-9036.

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
