

Aldaraia Business Central Extensions

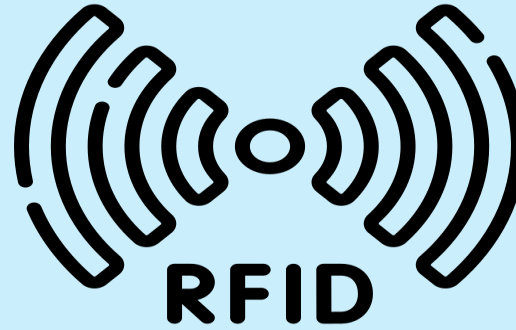

The trending ERP solution for small to mid-sized business.
Leveraging SaaS and a rich ecosystem of third-party ISV extensions.
Custom extension packages targeted at luxury retailers at-scale.
Providing tighter inventory control and automation.

What are your solutions for Business Central?

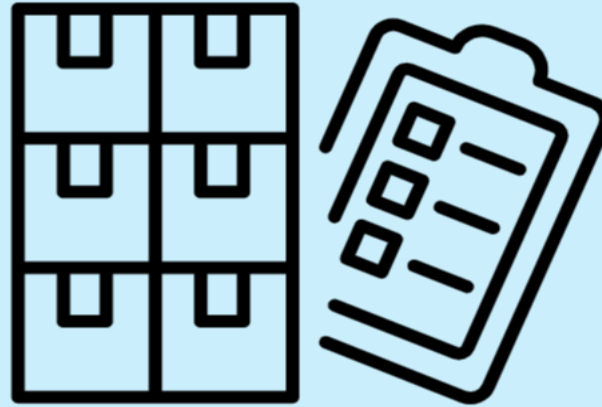

A luxury retailer already operating or considering moving to BC requires tight inventory control and the ability to be agile when managing their merchandise. Our extension packages fulfill those requirements, allowing the retailer to spend less time in front of a computer. And less time tracking where their high-end items are located.

Aldaraia RFID

- UHF RFID stock tags --- Small form factor, with long read ranges.
- UHF RFID printers --- Providing printed price tags with encoded identification markers.
- UHF RFID readers --- Automated reads and logging.
- BC integration --- Both FIFO and serialized items are tracked and reportable.
- Web service exposure --- API endpoints are provided for third party integration possibilities.

Aldaraia Inventory

- Vendor catalog cost/price updates.
- Vendor price discount promotions.
- Vendor inventory item receipts.
- Inventory item attribute updates.
- Vendor consignment transactions.
