ALDARAIA

This Is Soyga

THE BEST BRANDS UNDERSTAND THAT A SALE DOESN'T MARK THE END OF A CUSTOMER'S JOURNEY BUT RATHER THE BEGINNING.

WE CONNECT THE WORLD'S FINEST BRANDS TO THEIR CUSTOMERS AFTER THE POINT OF PURCHASE THROUGH TRACKING, AUTHENTICATION, SERVICING, AND CONTENT.

SOYGA LEVERAGES EXPERIENCED AUTHENTICATORS AND BLOCKCHAIN TECHNOLOGY TO BRING OWNERSHIP OF LUXURY PRODUCTS TO THE TWENTY-FIRST CENTURY

How It Works

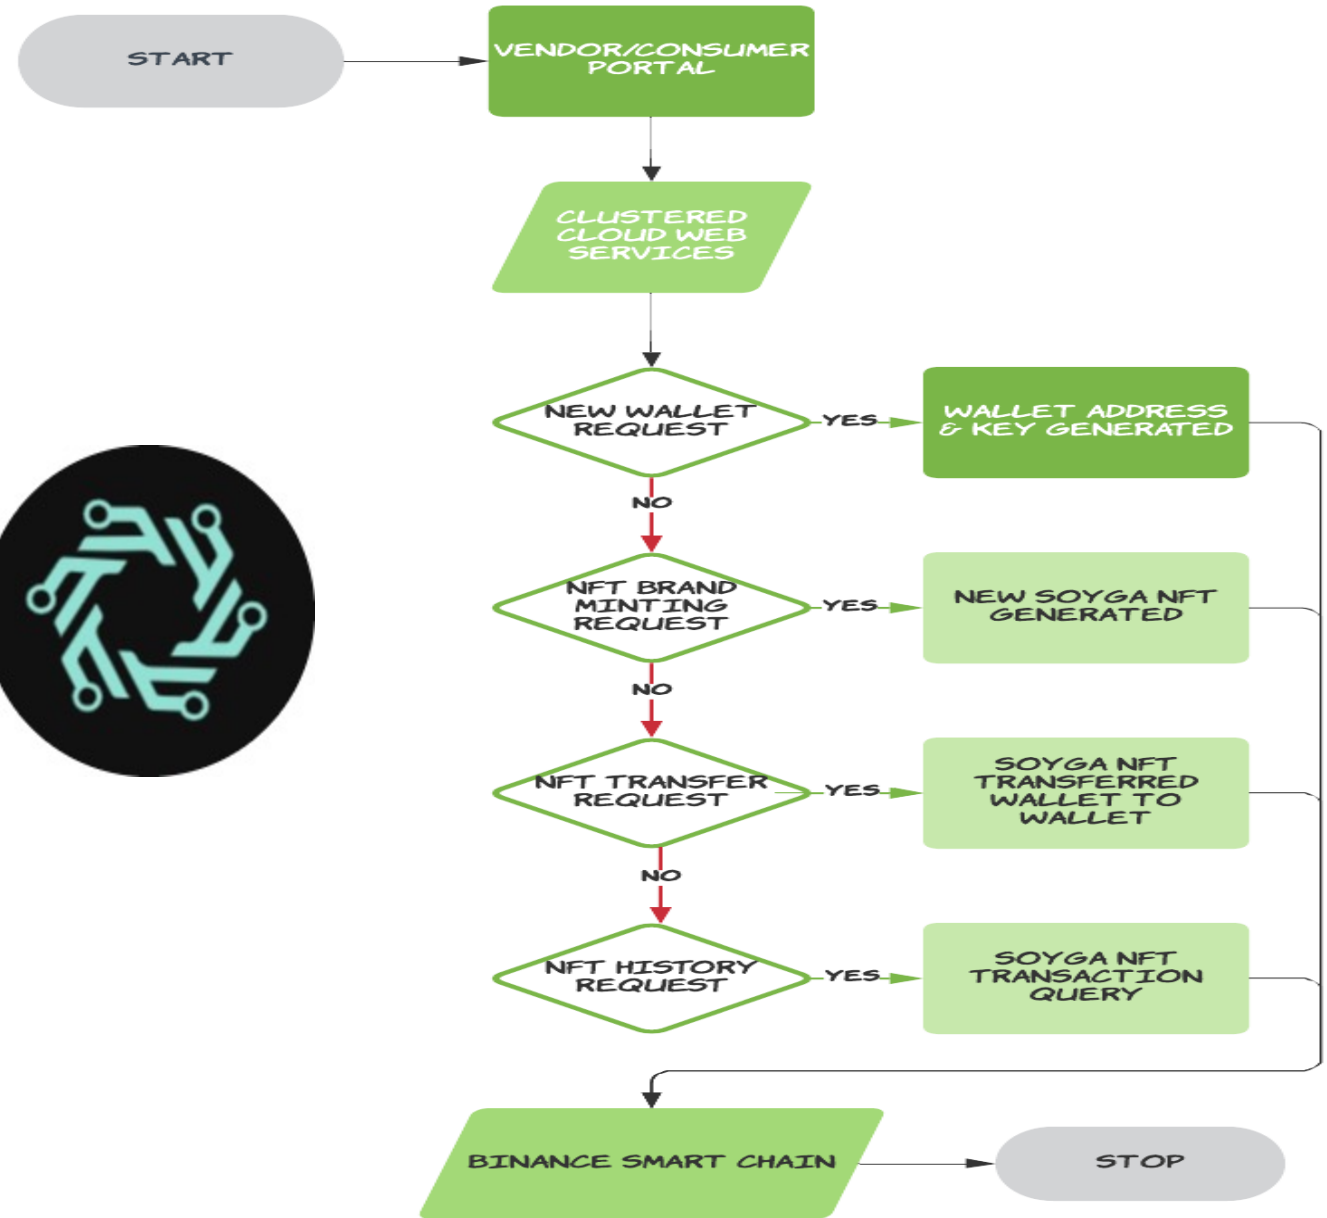

When a user adds an item to SOYGA they are creating a digital duplicate of the physical piece on the blockchain known as an NFT. Information can then be added to the blockchain over an item's lifetime to create a robust product history.

SOYGA allows users to manage their portfolio of items in one easy-to-use application with the ability to access brand information and initiate authentication or servicing with the press of a button.

Benefits To The Brand

SOYGA doesn't just add value for consumers – it also gives brands visibility on how their products are used, cared for, serviced, and eventually sold. Promoting authentication and servicing in the blockchain also combats against counterfeit goods and works towards making a healthy and transparent pre-owned market.

What is the Vendor/Consumer Portal?

SOYGA hides the complexity of working within the Web3 blockchain. The vendor/consumer downloads a lightweight front-end app. Using strong authentication and encryption, managing and transacting only those associated tokens is simpler than working with an online banking account.
