Staff attendance check on SMEs today

- SME companies need to install some biometric devices to check their users/visitors attendance.

- If there are multiple biometric devices, request to manually access all the devices to query staff's time log or to maintain a central server for all biometric devices storing time log data

- The company needs maintain their costly infrastructure

- Fingerprint with multiple users using raises hygiene concern

iAttendance

- **iAttendance** is an online platform (https://iAttendance.co) that allows companies to manage their staff attendance without any infrastructure requested

- User/staff simply scans QR code to check -in/check-out

- Company's admin can add/remove staffs and generating the report from the dashboard
