Looking for a Modern Central Vacuum?

Introducing the SuperVac 30, Hayden's latest innovation in central vacuum systems—specially designed for modern residential developments, condos, and apartments.

Built with full metal construction for superior durability, the SuperVac 30 features a sleek, ultra-compact design that installs in minutes—no in-wall piping or complex setup required. The Power unit mounts with just two screws, making it the perfect solution for builders and developers seeking a quick, cost-effective installation.

The new compact motorized power head with dirt-finder LED is a game changer: it will buff and clean your hard surface floors without scratching and with dual roller will work on any bare floor or carpeted surfaces. This is great for Hardwood & Area rugs and features a removable roller for east cleaning.
