- 
- Glowing made easy with these simple skincare tips!**
- **Cleanse:** Start with a gentle cleanser to remove impurities. Look for products with hydrating ingredients, like hyaluronic acid or glycerin.
 - **Exfoliate:** A weekly exfoliation helps to slough off dead skin cells, revealing a smoother complexion. Chemical exfoliants like AHAs and BHAs can be particularly effective.
 - **Moisturize:** Keep your skin hydrated with a moisturizer suited to your skin type. Consider a lightweight gel for oily skin or a rich cream for dry skin.
 - **SPF Protection:** Never skip sunscreen. A broad-spectrum SPF 30 or higher protects your skin from harmful UV rays and prevents premature aging.

Sissy Interview

Before

I've officially lost my
'real man' card!

By Arrabella Peters

Q. At what point did you know that you were better suited to taking cock rather than trying to fuck a pussy?

From a young age, I found myself drawn to my mum's bras and corsets, captivated by the snug feeling they provided. As I entered puberty, I realised I had an undeniable fascination with women's underwear, often daydreaming about what it would be like to be a woman rather than a man. Soon after that I started saving up and bought my first bra and tights then panties at a local woman's wear shop - it was so embarrassing going in the shop and asking for a bra but once I did there was no turning back.

Q. So we all know you're married ... Arrabella or should I call you Peter? Does your wife know you dress?

No she doesn't but has seen me dressed in fancy dress once as a tart. Yes I'm married and hide my clothes in the spare room in a bed drawer along with my toys. My real name is Peter and no one in my family or friends know about my secret life.

By Arrabella Peters

Q. Is there an age that is just too old to be a sissy?

No age is just a number and once a sissy always a sissy. I am 62 and still a sissy - if anything the older I get the more intense and extreme the urges are to be a sissy slut.

Q. What's the most explicit thing you have ever done in sissy mode?

I have wanked men off whilst dressed as a sissy. I have injected my own semen into my sissy bottom and climaxed on webcam to numerous men as they instructed me to do so. I have made men masturbate to me whilst dressed in sissy underwear for them whilst on webcam. I have tied my balls up for 24 hours one day until they nearly went black.

Q. What was the trigger to be exposed online?

I want the thrill and threat of everyone finding out about me. I like being photographed and spread - I'm an exhibitionist at heart but shy at the same time. All sissies are.

Q. How would Being found out by your family impact you life?

It would end in my divorce probably and being disowned by my entire family and friends.

Q. Do you really want your family to know your secrets?

Not really but the rush of the thrill sometimes outweigh that devastation. It's a fine line between fantasy and reality and sissies like me thrive on that.

@SSSEXPOSED

"I want to appear in extremely explicit sissy films!"

Q. How much further do you think you can go or want to go down the sissy/exposure route?

I secretly want to be the most exposed sissy in the world. I believe I can go much further and aspire to be like my sissy porn idols. I want to appear in sissy magazines and have appeared already on line in a couple of sissy magazines like strict mistress and sissy cock suckers named and shamed.

Q. What excites you now as you have been exposed so much?

I still get an enormous thrill when I see myself exposed on different sissy sites. I still want everyone to post my images everywhere - I give you all my permission to post my photos as public domain photos for everyone to enjoy.

Q. What are your goals/bucket list for the future?

To be a sissy porn star even at my age! I want to appear in extremely explicit sissy films.

Q. What is your biggest regret in your sissy life?

I regret not transitioning to be a woman. I would have wanted to have real breasts and no balls but just a limp useless teeny clitsize penis. I still think constantly of taking hormones to grow my breasts.

Sissy Interview

By Arrabella Peters

“It is a power trip for both of us”

Q. Do you think that financial domination is acceptable?

Yes and no - if there is an agreement between the submissive and the dominant that both want that then it is ok. Findom should not be used if either party are uncomfortable with it. It is however a very powerful form of intimacy - in the same way one would gift a present to your loved one. A dominants time is also precious and so if the submissive accepts that then there is nothing wrong in the submissive paying for that time and service.

Arrabella confesses about her adoration for Madam Malevolent

“I also wanted to say that I absolutely worship her - she is beautiful and sexy and powerful. I think of her every second of my life and how she can increase her dominance over me - my life is no longer my own but hers. I am indeed her property - she owns me!”

Q. Does it scare you that a dominant Goddess like Madam Malevolent “owns you”?

Madam Malevolent does own me - we have built up a trust with each other. Yes it is scary to think she has control over me but as a submissive sissy I have consented to be under her control. Over time she has found out all my information, my real name, my address, my family details even and of course literally hundreds of photos and videos of me as a sissy. The more a submissive gives to their dominant the more trust is built up. I trust her to mould me, advertise me and task me as her submissive. Once a submissive sissy bares their soul to a dominant by the exchange of power via information it becomes a very intimate and sexual relationship. As such once this has happened the submissive realises there is literally no going back and accepts such ownership. It is a form of contract. By giving Madam Malevolent my information and media I have given her permission to do as she so desires with it. So yes she owns me and it is a bit scary but we both get a form of sexual satisfaction from it. It is a power trip for both of us.
