The Celluma RESTORE red light therapy system is indicated for males and females with skin types I-IV on the Fitzpatrick Scale.

Is the Celluma RESTORE Right for You?

IMAGINE YOURSELF, BETTER THAN EVER

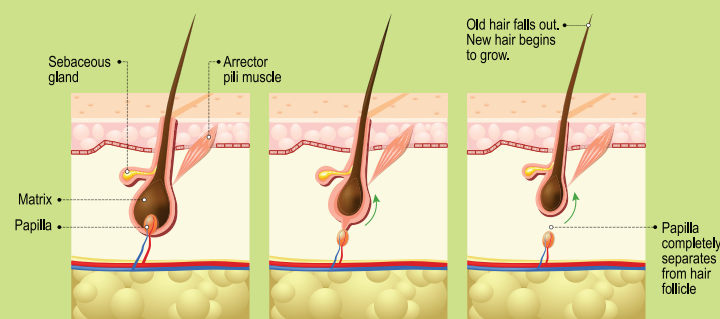

RED LIGHT THERAPY FOR Hair Restoration & More

The 3-mode Celluma RESTORE is the first red light therapy device to be FDA-cleared to treat three common concerns of the mature individual in a single LED light therapy device. Addressing hair regrowth, aging skin, and general pain conditions, the Celluma RESTORE is versatile, convenient and easy-to-use in a clinical setting or at home. Celluma's patented, shape-taking design permits customized placement over the head to effectively deliver light energy and promote hair regrowth. Additionally, the Celluma RESTORE can be placed anywhere on the body to reduce pain and improve the appearance of fine lines and wrinkles.

Low-level light therapy is a proven, effective and safe treatment for hair loss, aging skin and a variety of pain conditions. LED red light therapy devices have been cleared for treatment of male and female pattern hair loss. It helps to proliferate hair follicle size and prevent catagen hair development (the end of the active growth of a hair).

The Norwood Hamilton Scale and Ludwig-Savin Scale are used to help determine if light therapy will work for an individual. The Celluma RESTORE is FDA-cleared and CE marked to treat Androgenetic Alopecia and to promote hair growth in males who have Norwood-Hamilton classifications of IIa-V patterns of hair loss and to treat Androgenetic Alopecia and promote hair growth in females who have Ludwig-Savin Scale I-1 to I-4, II-1, II-2 or frontal patterns of hair loss; both with Fitzpatrick Skin Types I-IV.

THE NORWOOD HAMILTON & LUDWIG-SAVIN SCALES

LET'S TALK ABOUT *Women & Hair Loss*

Hair loss is not a strictly male health concern. While suffering mostly in silence, women make up a significant percentage of those who suffer from hair loss. According to the American Academy of Dermatology, 40% of women have visible hair loss by the time they are age 40. Many procedures and products are marketed to men to help with hair loss, while women are relegated to thickening shampoos and collagen supplements.

Hair loss in women can have an emotional toll impacting their self-image and potentially their mental and emotional well-being. For many women, hair loss can be a life altering condition.

Hair loss can be temporary or permanent. It can be heredity, or the result of medical conditions, or hormonal changes. It is generally considered a normal part of aging and affects both men and women alike.

The **Celluma RESTORE** now offers both women and men a non-invasive, non-toxic solution to many forms of hair loss (reference chart). Call today to talk to a Clinical Sales Specialist about how the **Celluma RESTORE** can help with not only hair restoration but also anti-aging, and general pain conditions — all in a single device!

AN LED PROTOCOL FOR *Healthy Hair & Scalp*

To obtain the best results, use **Celluma RESTORE** every other day, for 16 weeks.

Each Treatment: 30 min

- Before use ensure that your hair and scalp are clean.
- Before use ensure that your hair and scalp are completely dry.
- Separate the hair before illumination to expose the part of the scalp suffering from hair loss.
