Activsim Checklist

Letter Outline

Not sure what to say? That's okay! Imperfect is best.

Some suggestions for your comment, please write a comment in your own words though:

Please request that the UTC:

- **Require large electric power users to pay for all of their own costs**
- **Require the large power users to fund renewable energy sources that match 100% of their electricity use**
- **Require that utilities shut off power to datacenters in order to prevent blackouts**
- **Require utilities to provide increased transparency during the planning processes**
- **Reject requests for electric rate increases if the utility is adding large load customers**

Use some points from the Spokesman Review, Range articles or, spokane data center files at nospokanedatacenter.com

You can just speak from the heart - why this matters to you. Why you don't want data centers.

You can also say something like:

We NEED YOUR HELP to stop the data centers. Volunteer grassroots organizers shouldn't have to do this alone. You need to FIGHT WITH US TOO. You have the connections and understand the system. Don't leave us on the frontlines alone against Big Tech. Help us protect our community.

You can also do ONE email to everyone.
