|----------------|-------------|------------------------|

|  |
|--|
| DFM Subject: Drilled Via Pad Stack and Hole Size Recommendations |
|--|

### DFM Requirement:

- Drilled via pad stack recommendations – see Table 10.13a
- Drilled hole size recommendations – see Table 10.13b
- The minimum via pad size shall be 0.0195", utilizing a 0.010" drilled hole

Table 10.13a – Drilled Via Pad Stack Recommendations

|                      | V31RD18 | V25RD13 | V20RD10 | V19-5RD10 | V19-5/19RD10 |
|----------------------|---------|---------|---------|-----------|--------------|
| PRI MASK             | 0.025"  | 0.019"  | 0.015"  | 0.015"    | 0.015"       |
| PRI LAND             | 0.031"  | 0.025"  | 0.020"  | 0.0195"   | 0.0195"      |
| INNER LAND           | 0.031"  | 0.025"  | 0.020"  | 0.0195"   | 0.019"       |
| PLANE <sup>(1)</sup> | 0.044"  | 0.038"  | 0.034"  | 0.026"    | 0.026"       |
| SEC LAND             | 0.031"  | 0.025"  | 0.020"  | 0.0195"   | 0.0195"      |
| SEC MASK             | 0.025"  | 0.019"  | 0.015"  | 0.015"    | 0.015"       |
| DRILL <sup>(1)</sup> | 0.018"  | 0.013"  | 0.010"  | 0.010"    | 0.010"       |
| VIA PLUG             | 0.031"  | 0.025"  | 0.020"  | 0.0195"   | 0.0195"      |

Note 1: Anti pads shown – thermals are direct connections

### DFM Impact:

Following Table 10.13a ensures IPC requirements for annular ring are achieved. Following Table 10.13b ensures minimum plating thickness is achieved, which reduces the risk of barrel cracking due to insufficient plating.

# Axiom Electronics PCBA Design for Manufacturability Guidelines

Table 10.13b – Drilled Hole Size Recommendations

| PCB Thickness | Pad Size | Actual Drill Size | Annular Ring | Aspect Ratio | FHS    | FHS TOL      |
|---------------|----------|-------------------|--------------|--------------|--------|--------------|
| 0.062         | 0.018    | 0.0080            | 0.0050       | 7.8          | 0.0080 | .003 / -.008 |
| 0.062         | 0.020    | 0.0100            | 0.0050       | 6.2          | 0.0100 | .003 / -.010 |
| 0.062         | 0.025    | 0.0135            | 0.0058       | 4.6          | 0.0135 | .003 / -.010 |
| 0.079         | 0.018    | 0.0080            | 0.0050       | 9.9          | 0.0080 | .003 / -.008 |
| 0.079         | 0.020    | 0.0100            | 0.0050       | 7.9          | 0.0100 | .003 / -.010 |

Highest Capability

Lowest Cost, Highest Reliability

Maximum acceptable aspect ratio is 8:1

FHS = finished hole size  
FHS TOL = finished hole size tolerance
