

MEETINGBOX: ONLINE MEETING BACKGROUNDS

Another key part of my work for Meetingbox involved designing custom online meeting backgrounds. Created entirely in 3D, these backgrounds shared the same conceptual approach as the virtual event spaces but were intended for use during virtual meetings.

Each background was carefully crafted to reflect the company's branding and the professional tone expected by their high-profile clients. I applied the same level of detail as with the virtual events,

creating realistic environments and paying careful attention to the positioning of key elements. The layout ensured that individuals participating in the meeting would be properly placed within the frame, avoiding the coverage of important features like logos. This thoughtful arrangement provided a professional and well-balanced composition, ensuring that the branding remained visible and unobstructed throughout the meeting.
