

LAMINATION TOOLING

Serving the P.C. Industry Since 1977

EH-C450 Lamination Plate

■ Product Introduction

TADCO EH-C450 lamination plates are made for supporting mass lamination, especially copper clad lamination (CCL). EH-C450 has the characteristic of high toughness. Higher toughness makes the lamination plates better carry big panel size and heavy inner layer without getting warped. Our unique in-line heat treatment makes our product more cost-efficient without sacrificing the quality.

- ✓ **Fit the need for Mass Lamination- Copper Clad Lamination (CCL)**
- ✓ **Unique in-line heat treatment process**

■ Product Specification

Material	Hardness	Tensile Strength	Yield Strength	Thickness	Flatness	Surface
EH-C450	450±25HB	≥ 1300N/mm ²	≥ 1050N/mm ²	±0.2mm	0.036"/ft	Black/rust-resistance coating
