

Trendsetters International

Accredited Vs Non-Accredited School

What Does That Mean?

The simplest way to explain an accredited vs a non-accredited school is that a non-accredited cosmetology school cannot offer government funding/ financial aid, whereas a cosmetology school that is accredited can. The tuition at accredited schools may be significantly higher in comparison to tuition cost and fees at non-accredited schools. Trendsetters International is a privately owned and privately funded school having a payment plan options and programs available to students who cannot pay tuition in full upon enrollment. While receiving fundings from

accredited schools, students will not pay a monthly fee towards their tuition balance. Yet, upon graduation, will you be prepared to pay your monthly payments on your gov't loan and are you guaranteed employment upon graduation from the accredited school, making sure you don't ruin your credit. Trendsetters International also prepares students with the education needed to become licensed in the state of Kansas, Missouri and other states as well. Trendsetters International believes the quality of education is found in the classroom and not in the cost of the tuition.
