Question 3: The sun rises two hours earlier in Arunachal Pradesh as compared to Gujarat in the west but the watches show the same time. How does this happen?

Answer: The longitudinal gap between Arunachal Pradesh and Gujarat is about 30°. Due to this, there is time lag of about two hours between these states. Since Arunachal Pradesh is in the east hence the sun rises earlier here; compared to in Gujarat. The Indian Standard Time is taken from the time of Standard Meridian of India and hence the watches show the same time in both the states

Question 4: The central location of India at the head of the Indian Ocean is considered of great significance. Why?

Answer: The central location of India at the head of the Indian Ocean is considered of great significance because –

- It has given India a strategic advantage due to the Trans Indian ocean routes which connect the countries of Europe in the West and the countries of East Asia.
- This helps India to establish close contact with West Asia, Africa and Europe from the Western coast and with the Southeast and East Asia from the Eastern coast.
- The vast coastline and the natural harbours have benefitted India in carrying out trade and commerce with its neighbouring and distant countries since ancient times.
- It has given India a distinct climate than the rest of the Asian Continent.
- No other country has such a long coastline on the Indian Ocean as India. It is India's eminent position in the Indian Ocean which has given the name of an Ocean after it.
