COVID-19 Resources for GaPQC

OB Resources

- ACOG Obstetric Preparedness https://www.acog.org/education-and-events/simulations/covid-19-obstetric-preparedness-manual

- PRIORITY: Pregnancy Coronavirus Outcomes Registry
  - University of California San Francisco (UCSF) launched The PRIORITY study which includes all pregnant and postpartum patients that are PUI or COVID positive.
  - Purpose: gather data quickly to provide high yield information that improves patient care during this pandemic.
  - Visit the website for more information https://priority.ucsf.edu/

    HOW TO REFER A PATIENT (Suspected/Under Investigation OR Confirmed Case, Any Language Spoken):

    You do not need IRB or Research Ethics Board approval at your site because no research activities will occur there. Please ask the patient if she is willing to have her contact information shared with us.

    If you are referring a patient: - Click here: https://ucsf.co1.qualtrics.com/jfe/form/SV_26rDHOgjp4t23Zj, or - Call/text 415-754-3729 - Email at PRIORITYCOVID19@ucsf.edu.

    If the patient is self-referring: https://ucsf.co1.qualtrics.com/jfe/form/SV_8cyexkjt9NrcGdD We will then reach out directly to her to consent, enroll, and begin data collection. Here are more details about the study: https://priority.ucsf.edu/doctors

Neonatal

- COVID-19 Impact Audit
  - VON and AAP Section on Neonatal Perinatal Medicine (SONPM) created a tool to help newborn care teams understand the impact of COVID-19 in their own units and more broadly in the neonatal community. Our goal is to inform local and national decision-making for program evaluation and quality improvement.
  - COVID-19 resources and audit material are available on their website - https://public.vtoxford.org/covid-19/

- COVID-19 Registry for Newborns
  - AAP Section on Neonatal-Perinatal Medicine is inviting every hospital that takes care of infants to participate in a National Perinatal COVID-19 (NPC-19) Registry by submitting de-identified maternal and neonatal data as it pertains to perinatal COVID-19.
  - We are in need of more evidence about the relative risks of transplacental, perinatal, and postnatal transmission of this disease as well as about the efficacy of infection control practices.
  - Visit AAPs website for more information, protocol, REDCap data entry form etc. https://services.aap.org/en/community/aap-sections/sonpm/
