

BERET SIZE CHART

DCK® WARRIOR BERET / RISHI EXPORTS

How to Measure Your Head:

To ensure the perfect fit for your **DCK® Warrior Beret**, follow these steps to accurately measure your head size:

- Use a Flexible Tape: Use a soft, flexible measuring tape (tailor's tape). If you don't have one, use a piece of string and measure it against a ruler later.
- Positioning: Place the tape around your head, approximately 1 inch (2.5 cm) above your eyebrows and ears. This is where the band of the beret will sit.
- The "Two-Finger" Rule: Ensure the tape is snug but not too tight. For a comfortable fit, you should be able to slide two fingers under the tape.
- Measure Twice: Take the measurement in both centimetres (cm) and inches to ensure accuracy. If you are between sizes, we recommend choosing the larger size for maximum comfort
